

**IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF OHIO**

Heather Hitt and Alison Dirk individually and on
behalf of all others similarly situated,

Plaintiffs,

v.

Bayer Healthcare LLC; Bayer Corporation; and,
Elanco Animal Health, Inc.

Defendants.

Case No. 4:22-cv-1657

CLASS ACTION COMPLAINT

JURY TRIAL DEMANED

Plaintiffs Heather Hitt and Alison Dirk, on behalf of themselves and all others similarly situated (collectively “Plaintiffs”), by their attorneys, alleges upon information and belief, except for allegations pertaining to Plaintiffs, which are based on personal knowledge:

INTRODUCTION

1. Seresto flea and tick collars—some of the top-selling flea and tick preventative collars in the country—have been associated with tens of thousands of pet injuries and approximately 1,700 pet deaths. Defendants Bayer Healthcare LLC and Bayer Corporation (collectively “Bayer”) and Elanco Animal Health, Inc. (“Elanco”) (collectively, “Defendants”) hid that information from, and patently misled, consumers. Indeed, even after reports of Seresto’s serious side effects became public, Defendants have downplayed the reports and continued to represent that Seresto is safe for pets to use when it is not.

2. The danger of Seresto flea and tick collars is so severe that it instigated a Congressional investigation by the House Committee on Oversight and Reform’s Subcommittee on Economic and Consumer Policy. After an in-depth, 16 month investigation that involved review

of internal documents of the Defendants, which were not been made available to the public, the House Committee on Oversight and Reform’s Subcommittee on Economic and Consumer Policy issued a report in June of 2022 (“Seresto Report”) recommending a recall of the Seresto flea and tick collar due to the dangers it posed to pets and humans.¹

3. Indeed, Since Seresto collars were launched in 2012, the U.S. Environmental Protection Agency (“EPA”) has received reports of approximately 2,500 pet deaths and more than 98,000 other incident reports—all linked to the collars. Seresto’s danger stems from its unique combination of imidacloprid and flumethrin, two dangerous pesticides that, together, magnify their harmful effects. According to one retired EPA employee, Seresto flea and tick collars “have the most incidents of any pesticide pet product she’s ever seen.”² And as stated in the Seresto Congressional Subcommittee Report: “[t]he Seresto collar had nearly three times the rate of total incidents, and nearly five times the rate of “Death” or “Major” incidents, as the second most dangerous flea and tick product. The [Seresto] collar had nearly 21 times the rate of total incidents, and over 35 times the rate of “Death” or “Major” incidents, as the third most dangerous product.” Seresto Report at 1.

4. Moreover, due to the dangers and risks posed by the Seresto collars, Canada - after reviewing incident and toxicology studies - banned the sale of the Seresto collar within its borders based on its conclusion that the Seresto collar posed too great a risk to animals and humans to be safe for use. Other countries have required that severe warnings be placed on the packaging of the

² *Popular flea collar linked to almost 1,700 pet deaths*, available at <https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/>.

Seresto packaging to warn consumers of the risk, such as the word “POISON” in large font on the front of the packaging.³

5. At no point have Defendants disclosed this information to United States consumers. To the contrary, they have maintained and represented that Seresto collars are safe for pets to use. Despite Defendants’ claims, Seresto collars have resulted in millions of dollars in damages for pet owners—both in the form of collars that they overpaid for or would have never purchased had consumers known of Seresto’s dangers, and also in veterinarian and other medical expenses incurred by pet owners with pets injured by the Seresto collar and its pesticides.

6. Even worse, according to a senior scientist at the Center for Biological Diversity—an expert on pesticide regulations in the U.S.—the reported deaths and injuries are “just the tip of the iceberg.”⁴ “Most of the time, people are not going to make the connection or they’re not going to take an hour or so out of the day and figure out how to call and spend time on hold.”⁵

7. Defendants, of course, have not warned consumers because Seresto pet collars accounted for more than **\$300 million in revenue in 2019 alone**. Seresto pet collars are an enormous business segment, and consequently, Defendants have refused to make the product safer or warn consumers about the potential risks. While Defendants sell Seresto collars as “veterinary medicine,” that is a misnomer. The over-the-counter collars do not constitute “medicine” but rather, are toxic pesticides that can harm—and even kill—pets.

JURISDICTION

8. This Court has subject matter jurisdiction of this action pursuant to 28 U.S.C. §§ 1332(d)(2) and (6) of the Class Action Fairness Act of 2005 (“CAFA”) because: (i) there are 100 or more class members, (ii) there is an aggregate amount in controversy exceeding \$5,000,000, exclusive of interest and costs, and (iii) there is minimal diversity because at least one plaintiff and one defendant are citizens of different states.

9. This Court has supplemental jurisdiction over the state law claims pursuant to 28 U.S.C. § 1367.

PARTIES

Plaintiff Heather Hitt

10. Plaintiff Heather Hitt is a resident and citizen of Wellsville, Columbiana County, Ohio. She purchased Seresto Collars and used them on her dogs, Remington, JoJo, Piper, and Ruger. Plaintiff purchased the Seresto Collar because, consistent with Defendants' representations, Plaintiff believed it would promote the pets' health and not cause them harm.

11. Plaintiff Hitt purchased approximately six Seresto Collars. Plaintiff purchased the most recent collar for approximately \$69.99 on May 27, 2020, from Chester Veterinary Services LLC. Plaintiff used each collar she purchased on her pets consistent with manufacturer instructions.

Harm to Plaintiff Hitt's Dogs

12. After purchasing the Seresto Collars, Plaintiff Hitt placed them around her dogs' necks as directed by the instructions included with the Seresto Collar. However, after putting the Seresto Collars on her dogs, Plaintiff noticed that two of her dogs, JoJo and Ruger, experienced lethargy while wearing the Seresto Collars, and her other dog Remington experienced seizures. Remington unexpectedly passed away after he began using the Seresto Collar.

13. Plaintiff Hitt understandably grew concerned as a result of her pets' unusual symptoms and with Remington's unexpected death. Upon learning of the serious safety risks posed by the Seresto Collars, Plaintiff Hitt removed the Seresto Collars from JoJo and Ruger, her two remaining dogs, and has stopped using the Seresto Collar. However, she did not learn of the safety

risks posed by the Seresto Collars until after Remington passed away and, therefore, used the collar on him until his death.

14. Plaintiff Hitt undertook various efforts - specifically a visit to the veterinarian and use of dog mediation - to resolve the health issues that her dogs developed after she placed the Seresto Collars on her dogs. Unfortunately, these efforts were unsuccessful for Remington, and the adverse effects of the Seresto Collar resulted in him passing away.

15. Plaintiff Hitt incurred out-of-pocket expenses in the amount of \$2213.49, including but not limited to the cost of replacing Seresto Collars, and veterinary visits. These expenses were incurred as a result of the harm caused by Plaintiff Hitt's use of the Seresto Collars on her dogs.

16. Had Defendants disclosed the existence of the serious safety risks associated with Seresto Collars and made Plaintiff Hitt aware of such risks, Plaintiff Hitt would not have used the Seresto Collar on her dogs and they would never have suffered the injuries they developed as a result of using the Seresto Collar. Additionally, Plaintiff Hitt would never have incurred the out-of-pocket medical expenses for her dog's treatment for injuries arising from use of the Seresto Collar.

17. Both Plaintiff Hitt and her dogs were harmed as a result of the purchase and use of the Seresto Collars, which could have been prevented had Defendants disclosed the existence of the serious safety risks associated with the Seresto Collars.

Plaintiff Allison Dirk

18. Plaintiff Allison Dirk is a resident and citizen of Lyndhurst, Cuyahoga County, Ohio. She purchased Seresto Collars and used them on her dogs, Sammy and Milo. Plaintiff purchased the Seresto Collars because, consistent with Defendants' representations, Plaintiff believed it would promote the pets' health and not cause them harm.

19. Plaintiff Dirk purchased two Seresto Collars. Plaintiff purchased the first collar for approximately \$60.00 in September 2020 at her veterinarian and the second collar in July of 2021, again at her vet. Plaintiff used each collar she purchased on her pets consistent with manufacturer instructions. She placed one collar on her dog Sammy and the other collar on her dog Milo at approximately the same time in July, 2021.

Harm to Plaintiff Dirk's Dogs

20. Plaintiff Dirk placed the Seresto Collars around her dogs' necks as directed by the instructions included with the Seresto Collars. However, after putting the Seresto Collars on her dogs, Sammy and Milo, they both experienced weight loss and lethargy. Milo developed hair loss and a tumor on his neck. Sammy was hospitalized for several days.

21. Plaintiff Dirk understandably grew concerned as a result of her pet's unusual symptoms and removed the collars from both Sammy and Milo. After removing the collars, Sammy's and Milo's lethargy went away. However, Milo ultimately passed away due to the tumor. Due to his tumor, the veterinarian gave Milo only a few months to live, and Plaintiff Dirk decided to administer pain medication as his condition worsened. Plaintiff Dirk undertook various efforts to resolve the health conditions her dogs were experiencing, all of which developed after she placed the Seresto Collar on her dogs, Sammy and Milo.

22. Plaintiff Dirk incurred out-of-pocket expenses in the amount of \$ 3,394.92, including the cost of veterinary visits, examinations, and medications. These expenses were incurred as a result of Plaintiff Dirk's use of the Seresto Collar on her dogs.

23. Had Defendants disclosed the existence of the serious safety risks associated with Seresto Collars, and made Plaintiff Dirk aware of such risks, Plaintiff Dirk would not have used the Seresto Collar on her dogs, Sammy and Milo, and they would never have suffered the injuries

they developed as a result of using the Seresto Collar. Additionally, Plaintiff Dirk would never have incurred the out-of-pocket medical expenses for her dog's treatment for injuries arising from use of the Seresto Collar.

24. Both Plaintiff Dirk and her dogs were harmed as a result of the purchase and use of the Seresto Collar, which could have been prevented had Defendants disclosed the existence of the serious safety risks associated with the Seresto Collars.

DEFENDANTS

25. Defendant Bayer Healthcare LLC is a Delaware limited liability company headquartered in Whippany, New Jersey. It initially developed the Seresto pet collar and manufactured, advertised, labeled, and sold Seresto from 2013 until August 2020, when Bayer Healthcare LLC sold its Animal Health Division, including all rights to the Seresto product, to Elanco Animal Health LLC. Seresto Collars manufactured and labeled by Defendant Bayer are still sold today in May 2022.

26. Defendant Bayer Corporation is the parent of Defendant Bayer Healthcare LLC and is the creator and manufacturer of the Seresto collars at issue.

27. Defendant Elanco Animal Health Inc. is the world's second-largest animal health company. It is headquartered in Greenfield, Indiana and incorporated in Indiana. In August 2020, Elanco acquired Bayer's animal health division, including Seresto, for \$7.6 billion. Elanco continues today to own, manufacture, advertise, and sell the Seresto pet collar. The company touts itself as a "global animal health leader" that "rigorously innovate[s] to improve the health of animals", and asserts it adheres to three core values: "Integrity: Do the right thing in the right way", "Respect: Respect for people, our customers and the animals in their care", and "Excellence: Be accountable. Continuously improve. Deliver with discipline."

TOLLING OF STATUTES OF LIMITATION

28. Plaintiffs hereby incorporate by reference each of the preceding allegations as though fully set forth herein.

29. Because the defects in the Collars could not be detected until after they manifested, and, additionally, because Defendants have denied and purposefully concealed the defect in the Seresto Collars and the dangers of its pesticides, Plaintiffs and the members of the proposed classes were not reasonably able to discover the problem, despite their exercise of due diligence.

30. Defendants knew, or should have known, about the defects from the outset after appropriate reasonable safety studies had been conducted, or after they received adverse incident reports through the EPA, or after product complaints were submitted to retailers/distributors. Yet, Defendants have concealed or failed to disclose the dangerous safety defects associated with the Seresto Collars. Plaintiffs and others similarly situated could not have known about the safety issues prior to recent reports in March 2021, or even thereafter as Defendants have continued to deny any safety issues with the Collars, specifically representing that the Seresto Collars are safe.⁶

31. Defendants did not inform Plaintiffs about the defect inherent in the Products even though Defendants knew about the defect at the time of purchase.

32. Plaintiffs and the members of the proposed classes had no realistic ability to discern that the Collars were defective and dangerous and could cause their pets harm. Under the discovery rule, the statute of limitations does not begin to run until the time at which a reasonable individual could have discovered the defect. That rule is applicable to the claims asserted by

⁶ www.petbasics.com/campaign/seresto-safety/ (last visited August 26, 2022)

Plaintiffs and the members of the proposed classes.

33. Any applicable statute of limitation is tolled by Defendants' knowledge, active concealment, and denial of the facts alleged herein. Defendants are further estopped from relying on any statute of limitation because of their concealment of the defects in the Seresto Collars.

34. Defendants are estopped from relying upon any statutes of limitations or statutes of repose by reason of their fraudulent and negligent misrepresentation, suppression, and concealment of material facts, and any applicable statutes of limitations and/or repose are tolled by such conduct.

35. As a result of Defendants' omissions and misrepresentations, Plaintiffs and the other members of the proposed classes did not know about the Defect inherent in the Products.

FACTUAL ALLEGATIONS

Factual Allegations Relevant to Each Plaintiff

36. At the time of purchase, Plaintiffs reasonably believed the Seresto Collars were safe and did not present a risk to their pets' health to use, based on a review of the Seresto Collar's packaging.

37. On the front of each package, in bold and capitalized font, where it cannot be missed by consumers, the Seresto Collars promise to provide "8 MONTH PROTECTION." for one's pet. Yet despite Defendants' representations, The Seresto Collars posed a significant risk to pets for the reasons described herein.

38. Nowhere on the Product packaging or labeling were there warnings or other representations indicating that the Seresto Collar may harm or kill pets, or that the Seresto Collars could cause any adverse side effects at all. For this reason, Plaintiffs never viewed or read any such warnings.

39. Had Defendants disclosed the existence of the serious safety risks associated with use of the Seresto Collars, and made Plaintiffs aware of such risks, Plaintiffs either would not have purchased or used the Seresto Collars, or else would have paid significantly less for them. Consequently, Plaintiffs did not receive the benefit of their bargain.

40. Furthermore, Plaintiffs suffered economic harm because they spent more money on the Seresto Collars than Plaintiffs would have had paid had they known that Seresto fails to perform as represented and poses a serious risk to animals and humans. Due to Defendants' misrepresentations and omissions, Plaintiffs did not receive the product they intended to purchase—that is, a flea and tick collar which was fit for its ordinary purpose, the safe administration of flea and tick prevention to her dog. Thus, Plaintiffs did not receive the benefit of their bargain.

41. If the Seresto Collars functioned as advertised—and did not pose any serious risk to their pets, to themselves, or to others, associated with the Seresto Collar's use—Plaintiffs likely would, or at least would consider, purchasing additional Seresto Collars again in the future. Alternatively, if the Court were to issue an injunction ordering Defendants to comply with advertising and warranty laws, and to remediate the serious and ongoing safety risks associated with Seresto Collars, Plaintiffs likely would, or at least would consider, purchasing additional Seresto Collars again in the future. However, as currently labeled and advertised, Plaintiffs are unable to rely on the current labeling and advertising of the Seresto Collars when considering whether, in the future, to purchase the Seresto Collars again.

Defendants Created, Manufactured, Advertised, and Sold the Seresto Collars

42. In or around March 2012, Bayer began importing, distributing, marketing, and selling Seresto Collars across the United States. Around the time of the launch, Bayer issued a

Press Release announcing the product and describing its supposed benefits. The Press Release described Seresto Collars as pet collars that offered eight months of tick and flea prevention for dogs and cats. Bayer represented that Seresto Collars “offer[] pet owners the performance they expect from their monthly topicals, but deliver[] the active ingredients in an easy-to-use, convenient collar.” Further, Bayer promoted that the collar would provide “effective protection against fleas and ticks” for “eight months”, meaning pet owners would no longer suffer the “hassle of remembering to apply monthly treatments.” Bayer bragged that “no other flea and tick preventative on the market provides eight months of effective flea and tick protection with only one single application[.]”⁷

43. Since 2012, Defendants have sold 25 million Seresto collars in the USA.

44. Seresto Collars are currently sold for prices significantly higher than comparable products. For instance, consumers may pay as much as \$60 for one collar or as much as \$110 for a two-collar package. In comparison, Sentry flea and tick collars sell for \$6.96.⁸

45. The Collars are available in three sizes: Small Dogs, Large Dogs, and Cats.

⁷ <https://www.prnewswire.com/news-releases/bayer-healthcare-introduces-seresto-offering-easy-to-use-flea-and-tick-control-for-dogs-or-cats-that-lasts-eight-months-187650591.html>

⁸ <https://www.petco.com/shop/en/petcostore/product/sentry-dual-action-flea-and-tick-collar-for-dogs>

Image 1. Pictures of the front and back labels on the Seresto pet collar packaging.

46. Seresto Collars have been extremely lucrative for Defendants. For example, in 2019, Bayer reported revenues exceeding \$300 million for just its Seresto Collars. Bayer’s 2018 annual report indicates Bayer was “focusing on maximizing the continued growth of the innovative Seresto collar,” noting it was one of Bayer’s “best-selling animal health products” with 28.5% growth in sales. In 2016, Bayer reported 55.4% growth in Seresto sales. Similarly, in the fourth quarter of 2020 alone, Elanco earned \$64 million from the sale of this product. Elanco claims that Seresto is the “#1 selling non-prescription flea and tick brand.”

47. In marketing the Seresto Collars, Defendants conveyed to Plaintiffs and the other class members that they could be safely used on their pets. The packaging itself represents “8 MONTH PROTECTION.” Additionally, Defendant claim the Collars can be used without consultation with a veterinarian, for example, by advertising: “**no prescription required**,”⁹ “**vet-recommended**,”¹⁰ and marketing videos featuring veterinarians promoting Seresto Collars.

48. Seresto products are intentionally marketed directly to consumers. For example, Elanco’s website states that pet owners who lack professional veterinary knowledge can obtain “the information you need about this product” from Elanco’s website, claiming Seresto was subject to a 2014 “in-clinic experience trial” by which veterinarians recommended the Seresto Collars:

⁹ www.petbasics.com/our-products/seresto/

¹⁰ www.petbasics.com/our-products/seresto/#additional-resources

Veterinarian Responses

- 97% of veterinarians were satisfied or very satisfied with Seresto® for dogs or cats after 8 months (Dogs n=32, Cats n=27)¹
- 94% of veterinarians were likely or very likely to recommend Seresto® for their dog or cat patients (Dogs n=32, Cat n=28)²

Image 2. A picture of Seresto’s purported 2014 trial results.¹¹

49. However, the “study” touted on Elanco’s website was not a genuine trial of clinical significance as Defendants merely assessed “satisfaction” over an 8-month period. And those veterinarians and participants were compensated for participating in the “study.”

50. Defendants’ marketing also misleadingly conveys that the Seresto Collars function without entering a pet’s body, stating that the “active ingredients spread from the site of direct contact **over the skin surface**,”¹² or implying that Seresto provides “nonsystematic protection,” unlike oral products that enter a pet’s bloodstream:

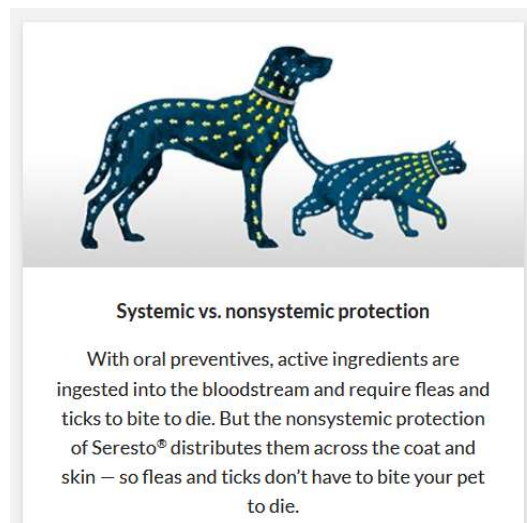

Image 3. Defendants’ representation of Seresto’s pesticides spreading over pets’ bodies.¹³

¹¹ Available at: www.elancodvm.com/our-products/seresto/seresto-dogs#section-Concerns

¹² www.petbasics.com/our-products/seresto/#additional-resources (emphasis added)

¹³ www.petbasics.com/our-products/seresto/

51. Defendants also emphasized the importance of the “**Bayer Polymer Matrix.**” This is part of Defendants’ patented “continuous release technology,” which they claim “ensures that both active ingredients [*i.e.* the pesticides] are slowly and continuously released in low concentrations from the collar towards the animal.”

52. Defendants knew or should have known that their statements and conduct caused the public and consumers to believe that the design of the Seresto Collars made pesticide overdosage and/or overexposure unlikely, demonstrated for instance, by the following exchanges involving Defendants’ distributor Chewy, who sold Seresto Collars:

After 8 months when you remove the collar, how long do you need to wait before you can put on a new flea collar?

Due to Seresto's low-dose, controlled-release technology, a new collar can be applied immediately.

By [chewy](#) on Feb 6, 2019 | Report

* * *

Is this safe to use on dogs around a toddler as long as the toddler does not play with the collar?

The active ingredients in Seresto® are released in low concentrations from within the collar to the pets skin. As long as the child is not handling the collar it will be safe for them to be around the pet.

By [chewy](#) on Nov 7, 2018 | Report

Can I remove the collar during the night? Our dog sleep with us in bed.

There is no need to remove the Seresto Dog Flea and Tick Collar at night even if your pet is sleeping with you. The collars have been rigorously tested to be sure they are safe for pets and people.

By [chewy](#) on Jul 7, 2019 | Report

Image 4. Customer comments about Seresto on Chewy.com.

53. Elanco also owns or otherwise operates the PetBasics website and YouTube Channel. One PetBasics video claims Seresto is the “#1 selling non-prescription flea and tick brand,” and links to an article on Petbasics.com states “Seresto for Dogs offers the performance you expect from a monthly flea and tick treatment like topicals or pills, with the convenience of an easy-to-use 8-month collar. You read that right. One effective, odorless, non-greasy collar = 8 months of protection.” It additionally claims Seresto uses an “innovative Sustained Release Technology” that “kills and keeps fleas and ticks off 8 continuous months.”

The Seresto Collars Use a Dangerous Combination of Pesticides

54. Defendants advertised that it uses a combination of two pesticides, imidacloprid and flumethrin with a unique, synergistic product. The labeling and package insert for Seresto states the two “active ingredients” (*i.e.* pesticides): imidacloprid (10%) and flumethrin (4.5%). Imidacloprid is a member of the neonicotinoid class of insecticides, targeting fleas. Flumethrin is a synthetic pyrethroid insecticide, targeting ticks.

55. In marketing the Seresto Collars, Defendants claim that “[f]lumethrin **works together** with imidacloprid to provide **dual action** against fleas and ticks. No other product has this **combination** of ingredients” and that “[s]tudies show that fleas and ticks are highly susceptible to the **combination** of imidacloprid and flumethrin found in Seresto.”¹⁴

56. The Seresto Collars’ “unique pharmacological synergism” that Defendants tout results in increased toxicity. Defendants knew or should have known of the increased toxicity since the collars’ introduction in 2012 and, in fact, studies have long shown the toxicity of both pesticides alone and of their dangerous effects when combined.

¹⁴ www.petbasics.com/our-products/seresto/#additional-resources (emphasis added).

57. Imidacloprid is a neonicotinoid pesticide that produces neuronal toxicities in insects. However, studies have shown that even small doses of imidacloprid can negatively affect animals.¹⁵ Household use of imidacloprid has also cause a range of side effects in humans, including skin rash, muscle tremor, difficulty breathing, vomiting wheezing lock jaw, memory loss, and renal failure.¹⁶ The EPA has found that in mammals, including humans, cats, and dogs, “[t]he nervous systems is the primary target organ of imidacloprid.”¹⁷ In studies of the effect of imidacloprid on rats and mice, often surrogates for humans, dietary exposure to imidacloprid included decreased movement and body weights, tremors, thyroid effects, retinal atrophy, and brain effects.¹⁸ Worse, the EPA found that dogs were more sensitive to imidacloprid than the standard test animals (*i.e.* rats and mice), including at doses seven times lower than the levels lower than the level of toxicity for mice and rats.¹⁹ Dogs exposed to imidacloprid suffered from severe tremors and trembling at medium to high doses.²⁰

58. In addition to the EPA’s findings, the California Environmental Protection Agency assessed imidacloprid. Its investigation found that acute oral exposure of imidacloprid to rats and mice caused tremors, decreased coordination and mobility, spasms, respiratory difficulties, and lethargy.²¹

¹⁵ See *Petition to Cancel Registration of PNR1427 (Brand Name Seresto)*, Ctr. for Biological Diversity at 5–6 (Apr. 8, 2021), https://www.biologicaldiversity.org/campaigns/pesticides_reduction/pdfs/2021-4-8-Petition-to-Cancel_SerestoCollarwExhs.pdf

¹⁶ *Id.* at 6.

¹⁷ *Id.*

¹⁸ *Id.*

¹⁹ *Id.* at 6-7.

²⁰ *Id.* at 7.

²¹ *Id.*

59. An independent study by Murray State University found that one of the pesticides in Seresto, imidacloprid, can cross the skin barrier and enter the blood of treated pets.²²

60. Finally, a systematic review of peer-reviewed literature on the health effects of neonicotinoids, like imidacloprid, on humans found imidacloprid caused malformations of the developing heart and brain, including memory loss and finger tremors.²³

61. Significantly, during the relevant time period, the Seresto Collars are the only end-use product in the nation that uses flumethrin, according to the EPA. The Bayer Group's CropScience Division developed flumethrin in the 1980s, and intended to use it with livestock, such as cattle (*e.g.*, Bayticol, Bayvarol). However, in or about 2003, Bayer sought to expand the market for its flumethrin, and began developing applications for dogs (*e.g.*, the Kiltix collar).

62. The Kiltix collar only used 2.25% flumethrin (in combination with propoxur); by contrast, the Seresto collar uses approximately double the amount of flumethrin (4.5%). Although the Kiltix collar contains less flumethrin than a Seresto collar, it carries a warning in some countries, like Australia, that it may cause paralysis and weakness.²⁴

63. Intoxication of flumethrin can affect the nervous and muscular systems. Recent studies have shown that mammalian exposure to pyrethroids caused learning deficiencies and physiological effects associated with neurodegeneration, Alzheimer's disease, and Parkinson's

²² Written Statement of Karen McCormack, Retired EPA Employee; U.S. House of Representatives Committee on Oversight and Reform Subcommittee on Economic and Consumer Policy Hearing on Seresto Flea and Tick Collars: Examining Why a Product Linked to More than 2,500 Pet Deaths Remains on the Market, June 15, 2022 available at <https://oversight.house.gov/sites/democrats.oversight.house.gov/files/McCormack%20Testimony.pdf>

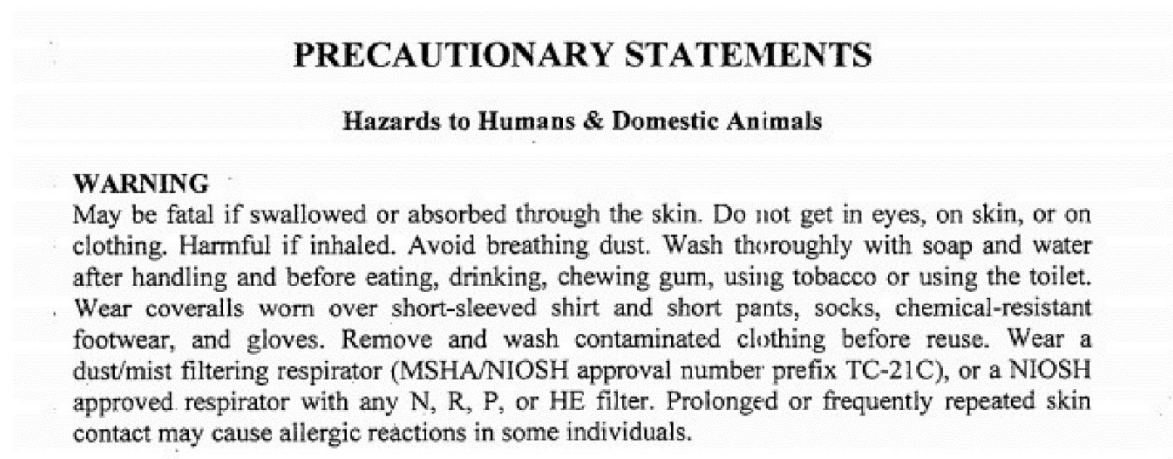

²³ *Id.* at 8.

²⁴ See Kiltix Tick Collar, *Vetshop Australia.com* (last visited May 2, 2022) (listing "Side Effects" including vomiting, diarrhoea, salivation, lethargy, and neurologic signs (weakness, paralysis)).

disease, among others.²⁵ The EPA’s 2012 human health risk assessment of flumethrin in pet collars indicated it has similar toxic effects to other pyrethroids. These included pawing, burrowing, writhing, salivation, coarse tremors, decreased body weights, and impaired motor activity.²⁶

64. Defendants have represented that they “thoroughly test[ed] Seresto, **including its active ingredients and collar components**, as part of its development for registration in the U.S. and approval globally” and also that defendants “closely monitor Seresto continuously to ensure its performance.”²⁷ Defendants have conveniently hidden the tens of thousands of safety incident reports from consumers.

65. Bayer, in fact, was well aware and previously acknowledged the risk of

flumethrin outside of the context of its pet collars. According to the registration statement filed by Bayer’s Animal Health Division with the EPA concerning flumethrin, Bayer warned of “Hazards to Humans and Domestic Animals,” including that it “may be fatal if swallowed or absorbed through the skin” that it is also “[h]armful if inhaled” and that one should “[a]void breathing [its] dust.” Specifically, the warning states²⁸:

²⁵ *Petition to Cancel Registration*, *supra* note 12, at 8–9.

²⁶ *Id.* at 9.

²⁷ www.petbasics.com/our-products/seresto/

²⁸ *Flumethrin Technical*, Bayer Healthcare LLC, at 3 (Feb. 13, 2013), https://www3.epa.gov/pesticides/chem_search/ppls/011556-00154-20130314.pdf

66. Despite recognizing flumethrin’s dangers, Defendants seemingly never engaged in any independent unbiased testing of the collars, but rather employed company-controlled studies (for example, through former-Bayer employee and current-Elanco employee, Dorothee Stanneck, DVM). Further, the publicly available studies of the Seresto Collars make no effort to consider long-term use.

67. As Defendants admitted, these two pesticides are dangerous alone and are even worse when combined due to their “synergistic” effect.²⁹ It is that effect that is harming, and sometimes killing, the pets that wear Seresto Collars. One former EPA employee, for example, opined that the cause of Seresto’s high adverse side effects is likely due to a reaction caused by the use of imidacloprid and flumethrin in combinations.³⁰ As Nathan Donley, a scientist at the Center for Biological Diversity, explained when discussing the number of complaints, “[y]ou don’t even see these kinds of numbers with many agricultural chemicals.”³¹

68. Indeed, although all flea and tick collars rely on some type of pesticides, no other flea and tick product has garnered as many complaints or resulted in as many complications as Seresto Collars. For instance, other flea and tick collars using different pesticides have had significantly fewer complaints than the Seresto brand. From 1992 to 2008, the EPA received about 4,600 incident reports regarding pet collars that use a different pesticide, tetrachlorvinphos, including 363 reported deaths. That is 30 times fewer incidents and 10 times fewer deaths than Seresto Collars have caused in just half the time (only eight years). The National Resources

²⁹ *Petition to Cancel Registration*, *supra* note 12, at 10–11.

³⁰ <https://investigatamidwest.org/2021/03/02/popular-flea-collar-linked-to-almost-1700-pet-deaths-the-epa-has-issued-no-warning/>

³¹ <https://investigatamidwest.org/2021/03/02/popular-flea-collar-linked-to-almost-1700-pet-deaths-the-epa-has-issued-no-warning/>

Defense Council in 2009, before Seresto Collars were on the market, found tetrachlorvinphos was one of the most dangerous pesticides at that time. The far higher number of complaints from Seresto Collars and the severity of the adverse effects suggest that the pesticides in Seresto Collars as the most dangerous flea and tick pesticides on the market.

69. Defendants were also on notice of the dangers that flea and tick collars pose when they release too much of the product too quickly. For instance, a study done by the Natural Resources Defense Council in 2009, three years before Bayer first released Seresto, found that the chemicals in flea and tick collars “are highly hazardous to animals and humans, and can damage the brain and nervous system, and cause cancers.”³² That study determined that “high levels of pesticide residue can remain on dog’s and cat’s fur for weeks after a flea collar is put on an animal” and that “[r]esidue levels produced by some flea collars are so high that they pose a risk of cancer and damage to the neurological system of children up to 1,000 times higher than the EPA’s acceptable levels.”³³

70. Notably, Defendants advertise that the Seresto Collars’ pesticides or “active ingredients” spread on the pet’s body, from “head to toe” and do so “continuously” over eight months.

71. Moreover, the Seresto Collars contain a third, undisclosed ingredient that may be toxic in high doses. Seresto Collars have a third, unspecified “Tradeseecret” ingredient. This secret ingredient is toxic at the following rates: with respect to dermal toxicity, the mystery ingredient indicates for LD50 rabbit: > 5,000 mg/kg; with respect to oral toxicity, it indicates for LD50 rat: 4,640 mg/kg, and with respect to acute toxicity, the “Tradeseecret” ingredient indicates

³² Miriam Rotkin-Ellman, et al., *Issue Paper: Toxic Chemicals in Flea and Tick Collars*, Natural Resource Def. Council (2009).

³³ *Id.*

LD50 intravenous mouse: 23 mg/kg. Furthermore, this “Tradeseecret” chemical can enhance the toxic effects of flumethrin.³⁴

72. Moreover, the Collars’ design exposes pets to high, dangerous levels of pesticides over an eight-month span (since the Collars are meant to be worn continuously for 8 months). That is not the case with most flea and tick preventatives.

73. Defendants, by contrast, advertised the Seresto Collar as a set-it and forget-it product that packed eight months’ worth of product into a single collar. Supposedly, Seresto Collars are designed to prevent pesticides from being released in high doses. However, Defendants acknowledged that Seresto Collars release the pesticides “continuously” and that the pesticides spread throughout the pets’ skin, and that the pesticides become effective within just six hours of application. The quick effectiveness of Seresto Collars’ pesticides suggests that the pesticides are in reality spreading quickly in high doses—an unsafe dosage of this pesticide combination – instead of in small, steady doses over 8 months as indicated on the front of the packaging.

74. Others have raised the same concern. For example, the California Department of Pesticide Regulation rejected certain studies when evaluating Seresto Collars, finding that “the multiple collar tests evidently greatly under-estimate exposures” and thus, the Department “did not accept th[ose] adult dog and cat studies[.]”³⁵

75. Because Seresto Collars’ “Sustained Release Technology” may be defective, high pesticide exposure can result in numerous and often dangerous side effects to consumers’ pets.

76. Whether the dangers stem from the combination of two pesticides (which no other product uses), the third secret ingredient that is toxic, the amount of pesticide in the collar, or a

³⁴ <https://datasheets.scbt.com/sc-395480.pdf>

³⁵ <https://investigatemidwest.org/2021/03/02/popular-flea-collar-linked-to-almost-1700-pet-deaths-the-epa-has-issued-no-warning/>

defective pesticide release technology, Seresto Collars cause significant harm. Given the many complaints issued to Defendants, to government agencies like the EPA, or made publicly online, Defendants knew or should have known Seresto Collars were dangerous to pet health. But Defendants failed to warn the public and, instead, represented that Seresto Collars were safe and effective.

Numerous Consumer Complaints Put Defendants on Notice of Seresto's Harmful Effects.

77. Separate and apart from the EPA data, there are numerous non-EPA reports of serious adverse incidents involving the Seresto Collars, of which defendants knew or should have known. For example, users of the Seresto Collars reported to Defendants, directly or via its retailers and distributors, that the Seresto Collars caused pets to suffer seizures, liver failure, an inability to walk, disorientation and aggression, cancerous tumors, severe skin damage, brain damage, severe vomiting, bloody bowel movement, pain and death, including these examples from online reviews:

★ ★ ★ ★ ★ **WARNING - This collar is extremely toxic to some cats ...**

Reviewed in the United States on June 10, 2018

Verified Purchase

WARNING - This collar is extremely toxic to some cats. My cat stopped eating, and by the time I realized it was the collar's fault she had already started liver failure. We are force feeding her to get her back up to snuff. The packaging warns about dermatitis issues, but not at all about the potential for toxins to cause your cat to stop eating. Cats cannot go without eating for long periods of time. Watch your cat VERY CAREFULLY after applying this collar and remove it if you see any signs of odd behavior - lethargy, decreased appetite, etc. It may take her days to recover after removal, so watch CAREFULLY.

★☆☆☆☆ **LONG BUT PLEASE READ: caused permanent epileptic brain damage**

Reviewed in the United States on December 23, 2016

DO NOT GET THIS PLEASE!!! PLEASE READ MY STORY. It is long but I want everyone to be aware something that Seresto does not warn you about. I am not one to make wild, conspiracy claims about products and just trust scientists and doctors who create medication, so coming from me, this is real.

About a year ago, my parents got this collar for our family dog (not cat but this applies anyways) while I was away at university. When I came home for a break I notice my dog having these strange head tremors randomly where her head would jerk for a few seconds. My parents never noticed it until I pointed it out to them because they don't pay attention to these things, so they couldn't tell me when the head tremors started. We took her to a vet who said they were small seizures, but not dangerous ones, and because they were so small, they didn't warrant anti-seizure medication. He said the risk associated with the medicine could potentially be more harmful than these small and apparently painless seizures, which he claimed were due to old age. I did not correlate it to the flea collar because she is old, and I never was warned of any seizure side effect or anything like that due to just what I thought was a topical flea medicine. And like I said, I wasn't home for the first few months of her having the collar to notice the onset's correlation.

When the collar expired, we took it off. I noticed that the head tremors were occurring less frequently -- most days there wouldn't be any, but they were still happening on occasion and especially during car rides. I still didn't put it together that they were caused by the collar... until this past week. We noticed fleas on her again and bought a new collar after a few months of no collar. Within 24 hours, the seizures were back and were MUCH MUCH worse than normal. The head jerking was violent and frequent and she seemed to be in pain, and during one of them she bit her tongue and it started bleeding. After the tremors stopped, she looked terrified and shocked.

I googled Seresto seizures and it turns out that there are many cases of people reporting seizures and other neurological conditions caused by this medication. I feel terrible because I didn't do any research on it the first time we had the collar. I just assumed that a topical flea medicine was no big deal, but seresto's main ingredient is a neurotoxin called Imidacloprid that messes up the brain functioning of insects, and in some cases: dogs too. ***I figured it was a pesticide but not a freaking neurotoxin!!!!

I called the vet and he backed this up saying that it is possible and he has seen it before in dogs. I feel terrible that I didn't correlate it the first time, but mainly I am FURIOUS that neither the vet nor seresto's warnings say ANYTHING about seizures. The only warnings on the pamphlet say skin irritations and hair loss in the area. Yet it has become very obvious to me and to many other people online who experienced the same thing, that this neurotoxin is a toxin to dogs as well. In the information pamphlet they also use a bunch of different words to describe Imidacloprid avoiding what it actually is: a poisonous toxic brain-altering pesticide. Imidacloprid is criticized as causing the endangerment of bees and frogs... like this is no joke. If I would have known that this is a TOXIN TO THE BRAIN, I would've never purchased it, but I just never would've thought such a thing, and they never call it a neurotoxin in any of their warnings. Its just absurd and nefarious for them to not put any warnings at all about what this pesticide is actually capable of doing. But unfortunately, animal medications have a lot less restrictions than human medications.

The vet said that removal will probably reduce but not cure, because the part of the brain that causes seizures has been altered permanently. I am devastated. It is NOT WORTH IT. PLEASE! Some of the cases online reported medical emergencies near to death because of violent seizures, birth defects, and other serious issues due to Seresto. Fleas are nothing compared to epileptic brain damage and death. Get flea soaps or literally anything else other than something that contains a freaking neurotoxin.

★☆☆☆☆ **BEWARE!!!**

Reviewed in the United States on June 11, 2020

Verified Purchase

Please beware of this product or for that matter maybe any other flea/tick collars. I have two dogs and saw the high rating on this product and decided to purchase and give a try. The day after receiving this product I placed them (correctly, according to the instructions) on my dogs. Since then, about 5 days after putting collars on, one of my dogs has become deathly sick, she has had uncontrollable diarrhea and now is going on 3 days of not eating anything, I am fearfully that she is not going to make it. My other dog, just starting a day ago, has stopped eating. I took the collars off both dogs yesterday 6.10.2020. This is the only change that has occurred with my dogs, all regular food and water has not changed. I am no scientist, however, the only variable that has changed since both of them being sick, is the fact that I purchased this product and placed it on my dogs. My only hope, beside that my dogs live through this, is that others read this post and DO NOT PURCHASE THIS PRODUCT and DO NOT PUT IT ON YOUR PETS. I feel terrible, because when it comes down to it, it was me that put the freaking collar on my dogs and now there is a very high chance that I will be the one responsible for killing my best friends. I am not looking for a refund, I am only writing this so that others will hopefully use better judgement than I did when deciding to use this product or others similar to it!!!!

Update...Had to put down one of my dogs yesterday 6.15.2020

★★★★★ **WARNING: Cancer Causing Collar**

By Carolyn K. on March 15, 2019

Please don't risk it! My healthy 8 year old cat developed oral cancer (squamous cell carcinoma) which escalated rapidly and I had to have her euthanized just 4 weeks after she displayed symptoms. Cats who wear flea collars are at least 5 times more likely to develop this deadly and horrifying cancer. I did not know this until it was too late. I truly believe the cause of my girl's cancer was wearing this flea collar. Cats should not be in these things - with the amount of licking they do they are exposed to the toxic pesticides to an unsafe degree. She was unable to groom, eat or drink because the growth under her tongue caused her so much pain. I wish I could go back and never order this collar. I might would still have my sweet girl.

★★★★★ Can kill your dog

Reviewed in the United States on April 5, 2021

This product caused my dog to get a massive cancerous tumor on her neck. She died within a few months. A few weeks ago there was an article on the front page of USA today about how this product is responsible for more than 1700 deaths that have been reported. It's poison.

* * *

★★★★★ DANGEROUS: This product should not be on the market

By davereader on August 29, 2019

My cat has been suffering from wounds and sores from severe chemical burns caused by this dangerous product. It is a reaction that some animals suffer from but if you read the reviews here or Google Serento Cat Collars, you will see hundreds of instances of injuries and even death. Some people swear by the collar and have had no problem for years. Then suddenly their pet gets burned. My cat has been treated for a few months now and new sores keep popping up - the vet believes this is because the toxicity is in the cat's bloodstream. I not only do not recommend this product to anyone but I will be doing everything I can to have this product pulled from the market. STAY AWAY!

Possibly a neurotoxin

Reviewed in the United States on June 27, 2020

Verified Purchase

Ok, the good: The collar is easy to adjust and apply. It has no discernible odors. It appears to be effective on fleas. Now for the bad: I put this collars on my cat, I noticed immediately that loose fur from her neck was collecting around the collar. I left it on thinking maybe it was just the rubbing and presence of something that is new . I let my cat out as I usually do. A few hours latter I called to her, she did not come. I gave her 10 minutes thinking she was near and will appear soon. I called again, no cat. I kept calling, I walked out into the yard to see if she had gotten her new collar caught on something, nothing. The next day I called to her, no cat. I walked around my complex looking for her, no cat. 48 hours and I am in a panic, called animal control no cat. A neighbor that I do not know but lives one complex away called me to tell me my cat was outside her unit and had been for a few days. This unit looks the same as mine but clear across from mine (there is a marsh canal between us). She must have gotten confused and walked all the way out to this other unit. This has never happened before, I've lived here for two years. When I got to the other unit, I called my cat, she did not appear to know me or where she was at. My cat was clearly disorientated and frightened I immediately took her home and removed the collar. She whimpered the rest of the day, shaking in her sleep, traumatized and still disorientated. The next day she was laying around still not herself, better but unsteady. I'm not sure if it was the collar that made her disorientated or not. I have a strong suspicion it was. My cat is fine now. I returned the collar and do not recommend it.

★☆☆☆☆ **HIGHLY DANGEROUS Flea and Tick Collar made by BAYER**

Reviewed in the United States on July 13, 2019

Verified Purchase

Had my dogs groomed. Bought a new Seresto Collar and put it on them the following day. Within 12 hours both dogs became lethargic along with episodes of continuous (severe) vomiting and diarrhea. The episodes were so bad that blood began to appear in both the vomiting and diarrhea. I couldn't think of where this all be coming from. They're both indoor dogs that weigh 7 and 6 pounds. The only thing new was putting the Seresto Collar on them, so I thought it would be best to remove the collars, which we did just prior to bringing them into the vet. After being evaluated, they received fluids and meds. While there we learned that another person was in just a few days prior with their dog who had the same symptoms soon after the Seresto Collar was put on him. We left the vet with meds and ~ \$500.00 bill. Thankfully both dogs were still alive and were better by the following day. I contacted Bayer to make them aware and to consider taking responsibility for the situation that had occurred. The representative was extremely insensitive to the situation that had occurred telling me that there was no way the Seresto Collar could've been the cause because it's not ingested. She told me that it had to be something else that caused them to get so sick. Regardless of whether ingested or topical the collar has chemicals on it, which caused my dogs acute illness. Bayer took absolutely NO RESPONSIBILITY and worse yet showed no empathy to what we'd experienced. I would HIGHLY RECOMMEND staying away from the SERESTO COLLAR and any other BAYER PRODUCTS.

Good news..... no fleas..... Bad news.... seizures. I bought this collar May 31, 2018 for my 15 lb Bichon. In September I started noticing her moods change. She would sit frozen and gaze into space and could not move. Then my groomer told me she had an "episode" at the groomers.... like she had "checked out" and not coherent. Then in late September she was playfully walking up the driveway when all of a sudden she froze and collapsed. Kept trying to stand up and could not. I grabbed her in my arms to take her inside the house. I sat her down and she walked off as if nothing happened. I called my vet and they dismissed anything I tried to tell them. She has had 3 more seizures that I know of to date. She also started to pee in bed. I know that the seizures that I have witnessed coincide with the bed peeing. I believe that after her seizures she cannot control her bladder. Going to have to find another way to keep the fleas at bay..... Can no longer put this on my dog.

☆☆☆☆☆ **Severe Neurological Reaction...**

Reviewed in the United States on January 3, 2018

Verified Purchase

The good news was that my dog had no fleas. The bad part...my dog started experiencing very severe neurological symptoms about 8 weeks into use of the collar. We initially did not think it was the collar. She started knuckling a lot while she was playing and would lose her footing easily while running. This was very out of the norm for her. Then she would be walking and her two back legs would just go out and she could not get up. She was unable to jump on the bed or the couch and had to be picked up. She would have random severe muscle spasms while laying down. We took the collar off and went to the vet, who was very concerned. Thank goodness all of her blood work was good and there was no kidney or liver issues or detected cancer. It took about 5 months before she was back to more normal. Her one back leg still doesn't seem to be the same, but she is alive. If your dog starts experiencing any of the above mentioned symptoms, take off the collar immediately. I wish I had never bought this. I believe it almost killed my dog.

★☆☆☆☆ **No more messy drops or sprays, so far I love this collar! - UPDATED!**

Reviewed in the United States on April 10, 2016

Verified Purchase

I have been very pleased with the collar. It is easy to use and adjust to fit, no messy drops to spill or have your pet rub them off onto the carpet or furniture. Ginger has had no negative reaction other than a little hair loss around her neck which was listed as a side effect but may just be part of her seasonal shedding. No sign of fleas or ticks on her at all, and the ticks have been particularly bad this year. Hopefully it will be just as effective in the summer months when the flea population typically explodes in the neighborhood.

Update 4/24/16: After wearing the collar for approximately 2 weeks, Ginger began to display signs of lethargy, hair thinning first at the neck then all over, loss of appetite, stumbling, thick discharge from eyes, then vomiting and diarrhea. Immediately removed the collar and bathed her in Dawn detergent, washed all of her bedding and her regular collars. Took her to the vet who treated her for mild shock and dehydration, ran blood work (came back normal) and administered fluids and anti-nausea/anti-diarrhea meds. Tonight she is mostly back to her old self. Vet says she had a toxic reaction to the flumethrin in the collar. Will be returning it tomorrow!

78. The above consumer comments and reviews also demonstrate that consumers have incurred significant veterinarian costs as a direct result of harm caused to pets by the Seresto

Collars.

79. In fact, a former-EPA section chief, Karen McCormack, stated that the Seresto Collars have the most incidents of any pesticide pet product that she observed during her lengthy career at the EPA, with climbing incidences.³⁶

80. Defendants' labeling and warning for the Seresto Collars misleadingly downplay any risk of the Seresto collar (including its ingredients and components), stating that "Individual sensitivities, while rare, may occur after using ANY pesticide product for pets" and that "As with any pesticide product, do not allow small children to play with the collar or reflectors, or to put them into their mouths." These generic warnings fall far short of adequate, especially where Defendants' marketing of the Seresto Collars is targeted at laypersons lacking specialized veterinarian knowledge or training.

81. Defendants did not adequately warn and disclose that the Seresto Collars are unique in that they were, and are, the only end-use pet product using flumethrin (a Bayer-created pesticide), nor did Defendants warn of the associated risks. As Bayer admitted in the 2014 Materials Safety Data Sheet for Seresto ("MSDS"), under the category of "Acute Dermal Toxicity," flumethrin is "Harmful in contact with skin." Indeed, an EPA memorandum from September 2019 indicated that over a two-and-half-year period (January 2016 to August 2019), the self-reported incidents of the flumethrin injuring a human (*i.e.*, pets' owners) totaled almost 1,000 injuries.³⁷

³⁶ Popular Flea Collar Linked to Almost 1,700 Pet Deaths, USA Today (Mar. 2, 2020), *available at*, www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/.

³⁷ EPA Memo re Flumethrin, at pg. 4 (9/17/19). For instance, a twelve-year-old boy who slept in bed with a dog wearing the collar was hospitalized due to seizures and vomiting; *Popular Flea Collar Linked to Almost 1,700 Pet Deaths*, USA Today (Mar. 2, 2021).

Figure 1. Flumethrin Incidents Reported to Main and Aggregate IDS from 2013 to 2018

Of the 19 major severity incidents that were further reviewed, the symptoms most often reported were dermal (n=8) and neurological (n=7). Note that a patient could exhibit multiple symptoms. Dermal symptoms reported include rash, redness, skin lesions, hives, and pruritus. Neurological symptoms reported include headaches, numbness, tingling and one person reported seizures.

82. The actual number is certainly higher as not all exposures and injuries would have been reported to the EPA.

83. The Seresto Collars' labeling and warning are also misleading as the only adverse effects expressly addressed are "site reactions" (*e.g.*, dermatitis, inflammation, eczema, or lesions). No other risks are disclosed, nor are any other warnings provided to consumers, including the risk of death, organ failure, loss of bodily function, seizures, and other major health incidents, such as those described *supra*. This serious omission is even more concerning considering the adverse incidents documented by the EPA.

84. In contrast with the information that Defendants provided to consumers with the Seresto Collars, a June 2016 document indicates that Defendants were aware, or should have been aware, that the Seresto Collars could cause neurological symptoms (*e.g.*, ataxia, convulsions and tremor), and the product should not be used if neurological symptoms manifest after using the Seresto Collars³⁸.

³⁸ <https://investigatemedwest.org/2021/08/13/the-epa-internally-raised-concerns-about-seresto-flea-collar-for-years-new-records-reveal/>.

85. On March 17, 2021, the U.S. House of Representatives Committee on Oversight and Reform Subcommittee on Economic and Consumer Policy requested that Elanco “immediately institute a temporary recall of all Seresto flea and tick collars ... following reports that the collars may have killed thousands of pets and may have caused injuries to many more pets as well as humans,” citing EPA documents that indicated “Seresto collars were associated with almost 1,700 pet deaths, over 75,000 incidents involving harm to pets, and nearly 1,000 incidents involving human harm.”³⁹ The Subcommittee noted that the “packaging for Seresto collars contains no disclaimer warning that the risks of toxicity may be so great that they could possibly be responsible for thousands of pet deaths.”⁴⁰

86. The Subcommittee then conducted an in-depth investigation of Defendants and the Seresto collar, including review of documents not made available to the public. After its extensive investigation, the Subcommittee issued a formal report in June of 2022, which concluded that the Seresto Collars on the market should be recalled and that future sale of Seresto Collars should be banned in the United States.⁴¹

87. Indeed, the Subcommittee recommendation is in line with countries such as Canada that have already banned sale of Seresto Collars within its borders due to the risk to the health of pets and humans that the Seresto collars pose. Specifically, in 2016, Canada Pest Management Regulatory Agency (“PMRA”) – based on a review of incident and toxicology studies – concluded that the collar posed too great a risk to pets and their owners to be sold in Canada.

88. In short, Defendants have entirely omitted the dangerous safety concerns

³⁹ <https://oversight.house.gov/sites/democrats.oversight.house.gov/files/2021-03-17.RK%20to%20Simmons-Elanco%20re%20Pet%20Collars.pdf>

⁴⁰ *Id.*

⁴¹ Available at <https://oversight.house.gov/sites/democrats.oversight.house.gov/files/2022.06.15%20ECP%20Seresto%20Staff%20Report%20FINAL.pdf>

associated with the Seresto Collars—omitting key information from consumers and misrepresenting the safety and efficacy of the product.

89. Defendants still deny any issues with the Seresto Collars. In March 25, 2021, Elanco claimed, “[t]here is no evidence in the scientific evaluation conducted for registration or the regularly reviewed pharmacovigilance data to suggest a recall of Seresto is warranted, nor has one been requested, or even suggested by any regulatory agency. As a result, Elanco continues to stand behind the safety profile of Seresto. It remains available to consumers as an effective way to protect pets against fleas and ticks that can transmit disease and can impact their quality of life.”⁴² This misleading message of safety was repeated by Jeffrey Simmons, the Chief Executive Officer of Elanco, before Congress on June 15, 2022 when he testified that: “Seresto [is] a proven solution that is not only effective at protecting dogs and cats from disease-carrying fleas and ticks, but also has a strong safety profile.”

90. Accordingly, Defendants are not only omitting safety information from the Collars but are also actively misleading consumers into believing the Collars are effective and safe.

CLASS ACTION ALLEGATIONS
(Northern District of Ohio Local Rule 23.1(b))

91. Pursuant to Federal Rules of Civil Procedure 23(a), 23(b)(2), 23(b)(3) and 23(c)(4), Plaintiffs bring this action on behalf of themselves and the following proposed Nationwide Class:

During the fullest period allowed by law, all persons in the United States who purchased a Seresto Collar for use on a pet and not for resale.

92. Pursuant to Federal Rules of Civil Procedure 23(a), 23(b)(2), 23(b)(3) and 23(c)(4), Plaintiffs bring this action on behalf of themselves and the following proposed Ohio Class:

During the fullest period allowed by law, all persons in the state of Ohio who purchased a Seresto Collar for use on a pet and not for resale.

93. Excluded from the Classes are: (i) Defendants, any entity in which any Defendant has a controlling interest or which has a controlling interest in any Defendant, and Defendants' legal representatives, predecessors, successors and assigns; (ii) governmental entities; (iii) Defendants' employees, officers, directors, agents, and representatives and their family members; (iv) all persons who make a timely election to be excluded from the class; and (v) judges and staff to whom this case is assigned, and any member of and judge's immediate family.

94. Certification of Plaintiffs' claims for class-wide treatment is appropriate because Plaintiffs can prove the elements of their claims on a class-wide basis using the same evidence as would be used to prove those elements in individual actions alleging the same claims.

95. **Numerosity – Federal Rule of Civil Procedure 23(a)(1) and Northern District of Ohio Local Rule 23.1(b)(2)(A).** Members of the proposed Classes are so numerous that the individual joinder of all absent Class members is impracticable. Class members have purchased hundreds of thousands of the Seresto Collars during the Class Period. Further information regarding the number of Class Members is ascertainable by appropriate discovery. Plaintiffs are

informed and so believe, based upon the nature of the trade and commerce involved, that the proposed Classes include many thousands of Class members who are geographically diverse so that joinder of all Class members is impracticable.

96. **Typicality – Federal Rule of Civil Procedure 23(a)(3).** Plaintiffs' claims are typical of the claims of putative class members in that each purchased a Seresto Collar for use on a pet. Plaintiffs and the Class Members were comparably injured through Defendant's uniform course of misconduct described herein. Plaintiffs and Class members all suffered the same harm as a result of Defendants' common, false, deceptive, and misleading acts and practices in the sale of the Seresto Collars. By advancing their claims, Plaintiffs will also advance the claims of all Class members because Defendants' unlawful conduct caused and continues to cause all Class members to suffer similar harm.

97. **Adequacy – Federal Rule of Civil Procedure 23(a)(4) and Northern District of Ohio Local Rule 23.1(b)(2)(B).** Plaintiffs will fairly and adequately protect the interests of the Class Members. Plaintiffs' interests and the interests of all other members of each respective class are identical, and Plaintiffs are cognizant of their respective duties and responsibilities to the Class Members. Further, the interests of the Class Members are not conflicting or divergent but, rather, are common. Accordingly, Plaintiffs can fairly and adequately represent the interests of both classes. Moreover, Plaintiffs' counsel are competent and experienced in litigating class actions, including litigation of this kind. Plaintiffs and their counsel intend to vigorously prosecute this case and will fairly and adequately protect the Class Members' interests.

98. **Commonality and Predominance – Federal Rule of Civil Procedure 23(a)(2) and 23(b)(3) and Northern District of Ohio Local Rule 23.1(b)(2)(C)-(D).** This action involves

common questions of law and fact, which predominate over any questions affecting individual Class members. Among the questions of law or fact common to the proposed Classes are:

- a. whether Seresto Collars pose safety risks to Class Members' pets, as described herein,
- b. whether Defendants knew or should have known that Seresto Collars pose safety risks to Class Members' pets, described herein,
- c. whether Defendants failed to warn consumers regarding the safety risks the Seresto Collars pose to Class Members' pets, as described herein,
- d. whether Defendants failed to disclose material information concerning the safety risks posed by the Seresto Collars to Class Members' pets,
- e. whether Defendants representations and omissions concerning the Seresto Collars involved representations and omissions of material fact;
- f. whether Defendants concealed the safety risks posed by Seresto Collars to Class Members' pets, as described herein,
- g. whether Defendants breached warranties with purchasers when they marketed and sold Seresto Collars as safe for pets, which posed risks known to Defendants but unknown and undisclosed to consumers, as described herein,
- h. whether Defendants engaged in unfair, unconscionable, or deceptive trade practices by selling and/or marketing the Seresto Collars that pose safety risks pets, as described herein,
- i. whether Defendants conduct violates the consumer protection statutes at issue in this litigation,

- j. whether Defendants breached express warranties to Class Members,
- k. whether Defendants breached implied warranties of merchantability to Class Members,
- l. whether Defendants were negligent in selling the Seresto Collars,
- m. whether Defendants' conduct was unjust and in violation of principles of justice, equity and good conscience,
- n. whether Plaintiffs and Class Members conferred financial benefits on Defendants by purchasing the Seresto Collars,
- o. whether it is unjust for Defendants to retain the benefits conferred by Plaintiffs' and Class Members' overpayments for the Seresto Collars,
- p. whether Plaintiffs and the class members are entitled to damages, including compensatory, exemplary, and statutory damages, and the amount of such damages and the amount thereof, and
- q. whether Plaintiffs and Class Members are entitled to equitable relief, including but not limited to a preliminary and/or permanent injunction.

99. **Superiority - Federal Rule of Civil Procedure 23(b)(3) Northern District of Ohio Local Rule 23.1(b)(2)(D).**.. A class action is superior to any other available means for the fair and efficient adjudication of this controversy, and no unusual difficulties are likely to be encountered in the management of this class action. The quintessential purpose of the class action mechanism is to permit litigation against wrongdoers even when damages to an individual plaintiff may not be sufficient to justify individual litigation. Here, the damages suffered by Plaintiffs and the Class are relatively small compared to the burden and expense required to individually litigate their claims against Defendants, and thus, individual litigation to redress Defendants' wrongful

conduct would be impracticable. Individual litigation by each Class member would also strain the court system, create the potential for inconsistent or contradictory judgments, and increase the delay and expense to all parties and the court system. By contrast, the class action device presents far fewer management difficulties and provides the benefits of a single adjudication, economies of scale, and comprehensive supervision by a single court.

100. Declaratory and Injunctive Relief – Federal Rule of Civil Procedure 23(b)(2).

Class certification is also appropriate under Rule 23(b)(2) because Defendants have acted and refused to act on grounds generally applicable to the class as a whole, such that final injunctive relief is appropriate with respect to the class as a whole. Plaintiffs assert claims for injunctive relief and restitution arising from Defendants' false, misleading, and deceptive advertising and Defendants' failure to disclose the material risks of use of the Seresto Collars on pets

101. This action is also properly maintainable under Rule 23(c)(4) in that particular issues common to the class, as described above in part, are most appropriately and efficiently resolved via class action, and would advance the disposition of this matter and the parties' interests therein.

FIRST CLAIM FOR RELIEF
VIOLATION OF THE INDIANA DECEPTIVE
CONSUMER SALES ACT (“IDCSA”)
Ind. Code § 23-5, *et seq.*
(By Plaintiffs Individually and on Behalf of
the Nationwide Class against All Defendants)

102. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

103. The Indiana Deceptive Consumer Sales Act (“IDCSA”) was enacted to “simplify, clarify, and modernize the law governing deceptive and unconscionable consumer sales practices[.]” “protect consumers from suppliers who commit deceptive and unconscionable sales acts[.]” and “encourage the development of fair consumer sales practices.” Ind. Code § 24-5-0.5-1(b). The act is intended to be “liberally construed and applied to promote its purposes.” *Id.* § 24-0.5-5-1(a).

104. The IDCSA prohibits “deceptive representations as to the subject matter of a consumer transaction,” including: “[t]hat such a subject of a consumer transaction is of a particular standard, quality, grade, style, or model, if it is not and if the supplier knows or should reasonably know that it is not” and that “[t]he consumer will be able to purchase the subject of the consumer transaction as advertised by the supplier, if the supplier does not intend to sell it.” *Id.* § 24-5-0.5-3(a)(1), (11).

105. Under the IDCSA, a “consumer transaction” means “a sale, lease, assignment, award by chance or other disposition of an item of personal property, real property, [or] a service . . . to a person for purposes that are primarily personal, familial, charitable, agricultural, or household, or a solicitation to supply any of these things.” *Id.* § 24-5-0.5-2(a)(1).

106. A person relying on an “uncured or incurable deceptive act may bring an action for damages actually suffered as a consumer as a result of the deceptive act or five hundred dollars (\$500), whichever is greater.” *Id.* § 24-5-0.5-4.

107. An “uncured deceptive act” means a deceptive act where a consumer who has been damaged by such act has given notice to the supplier and either (1) no offer to cure has been made to such consumer within 30 days or (2) the action has not been cured as to such consumer within a reasonable time after the consumer’s acceptance of the offer to cure.

108. An “incurable deceptive act” means a deceptive act done by a supplier as part of a scheme, artifice, or device with the intent to defraud or mislead.

109. Defendants represented in the Seresto Collar packaging, labeling, marketing, advertising, and promotion that the Seresto Collars provide a safe means of flea and tick prevention for consumers’ pets. Defendants have continued to tout the safety of the Seresto Collars even though the Seresto Collars have been linked to almost 1,700 pet deaths, over 75,000 incidents involving pet harm.

110. Contrary to these representations, the Seresto Collars pose an unreasonable safety risk to pets.

111. Defendants omitted, concealed, and failed to disclose to consumers that the Seresto Collars pose serious safety risks to pets, including that the Seresto Collars were inherently defective; unreasonably dangerous; not fit to be used for their intended purpose; contained unsafe levels of imidacloprid and flumethrin; and/or caused serious health problems. Rather than disclose this information, Defendants marketed the Seresto Collars as safe for their intended purpose.

112. Defendants have committed an “incurable deceptive act” within the meaning of the IDCSA, as follows:

- a. Defendants manufactured, distributed, marketed, advertised and sold the Seresto Collars, which posed serious safety risks to pets (as evidenced by the thousands of injuries and deaths), and which serious safety risks existed when the Seresto Collars left Defendants' control and at the point of sale;
- b. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, but omitted and failed to disclose or concealed these risks from consumers;
- c. Defendants knew the serious safety risks posed by the Seresto Collars were unknown to consumers, and would not be easily discovered by Plaintiffs and Class Members, and would defeat their ordinary, foreseeable and reasonable expectations concerning the performance of the Seresto Collars;
- d. Defendants warranted that the Seresto Collars are part of a pet's regular health regimen and provide a safe means of flea and tick prevention, when, in fact, the Collars pose serious safety risks to pets; and
- e. Defendants represented to consumers, including Plaintiffs and Class Members, that the Seresto Collars are safe and fit for the use for which they were intended, despite the fact that Defendants knew, or otherwise should have known, that the Seresto Collars were unsafe and unfit as part of a pet's health regimen, posing serious safety risks to consumers' pets.

113. Contrary to Defendants' warranties and representations that the Seresto Collars were safe and suitable for their intended use, the Seresto Collars, which are marketed as being part of a pet's regular health regimen, are unsafe as designed, manufactured, marketed, and sold. The Seresto Collars posed serious and continuous safety risks to pets.

114. Defendants had exclusive knowledge of material facts concerning the serious safety risks posed by the Seresto Collars to pets.

115. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs and the other Class Members, and their pets based upon: (1) their own internal testing, data, and surveys; (2) numerous consumer complaints lodged directly with Defendants; (3) numerous consumer complaints lodged to retailers; (4) numerous consumer complaints and reports lodged with the EPA; and (5) numerous consumer complaints on online fora.

116. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants actively concealed the serious safety risks from consumers by failing to disclose the serious safety risks to consumers.

117. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants denied the existence of the serious safety risks to pets.

118. Defendants' misrepresentations were material to Plaintiffs' and the other Class members' decision to purchase the Seresto Collars.

119. Defendants' deceptive acts and practices, including their representations and omissions, were material, in part, because they concerned an essential aspect of the Seresto Collars, including the intended use and safety. Such facts would naturally affect the conduct of purchasers and a reasonable person would have considered those facts to be important in deciding whether to purchase the Seresto Collars. Rather than disclose this information, Defendants marketed and labeled the Seresto Collars as a safe means of flea and tick prevention for pets.

120. Defendants' misrepresentations and omissions regarding the inherently defective and unreasonably dangerous nature of Seresto Collars were and are directed at consumers in a uniform manner.

121. Defendants' practices described herein were likely to deceive, and did deceive, consumers acting reasonably under the circumstances. Consumers, including Plaintiffs and the other Class Members, would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with use of the Seresto Collars had been known had they known that the Seresto Collars posed serious safety risks to them and their pets.

122. Plaintiffs have provided notice to Defendants in accordance with the IDSCA. Defendants failed to respond or fail to address Plaintiffs' demands, accordingly, Plaintiffs also allege here that Defendants also committed an "uncured deceptive act."

123. Plaintiffs and the other Class Members seek all damages and remedies, including equitable relief, allowable under the IDCSA.

SECOND CLAIM FOR RELIEF
VIOLATION OF THE KANSAS CONSUMER PROTECTION ACT ("KCPA")
Kan. Stat. Ann. § 50-623, *et seq.*
(By Plaintiffs Individually and on Behalf of
the Nationwide Class against All Defendants)

124. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

125. The Kansas Consumer Protection Act ("KCPA") provides, "[n]o supplier shall engage in any deceptive act or practice in connection with a transaction." K.S.A. § 50-626(a).

126. The KCPA also provides, "[n]o supplier shall engage in any unconscionable act or practice in connection with a consumer transaction." K.S.A. § 50-627(a).

127. The KCPA defines deceptive acts and practices to include, “the willful failure to state a material fact, or the willful concealment, suppression or omission of a material fact.” KCPA § 50-626(b)(3).

128. The KCPA provides, “[a]n unconscionable act or practice violates this act whether it occurs before, during or after the transaction.” K.S.A. § 50-627(a). “In determining whether an act or practice is unconscionable, the court shall consider circumstances of which the supplier knew or had reason to know, such as, but not limited to . . . [whether] (1) [t]he supplier took advantage of the consumer’s interests because of the consumer’s . . . ignorance; . . . (6) the supplier made a misleading statement of opinion on which the consumer was likely to rely to the consumer’s detriment. . .” K.S.A. § 50-627(b).

129. The KCPA shall be “liberally construed” to “protect consumers from suppliers who commit deceptive and unconscionable practices.” K.S.A. § 50-623(b).

130. Under the KCPA, the term “consumer” is broadly defined to include any person or persons who “seeks or acquires property or services for personal, family, household, business or agricultural purposes.” K.S.A. § 50-624(b). Plaintiffs and the Class are “consumer[s]” under the KCPA.

131. Under the KCPA, the term “property” includes “real estate, goods, and intangible personal property.” K.S.A. § 50-624(j). The Seresto Collars are “property” within the scope of the KCPA.

132. Under the KCPA, the term “supplier” is defined as, “a manufacturer, distributor, seller, lessor, assignor, or a person who, in the ordinary course of business, solicits, engages in or enforces consumer transactions, whether or not dealing directly with the consumer.” K.S.A. § 50-624(l). Defendants are “suppliers” under the KCPA.

133. Under the KCPA, the term “consumer transaction” is defined as a “sale, lease, assignment or other disposition for value of property or services within this state . . .”. K.S.A. § 50-624(c). A consumer transaction occurred between Plaintiffs and the other Class Members, and Defendants in the sale of the Seresto Collars.

134. Plaintiffs purchased the Seresto Collars for personal use.

135. The KCPA authorizes private causes of action and class actions. K.S.A. § 50-634(d). Plaintiffs and the other members of the proposed class are individuals entitled to bring suit and recover under the KCPA.

136. Defendants engaged in unlawful and deceptive acts and practices concerning the sale of the Seresto Collars in violation of federal law and the KCPA.

137. Defendants engaged in unconscionable acts and practices concerning the sale of the Seresto Collars violation of federal law and the KCPA.

138. Defendants engaged in the following unconscionable, unfair, deceptive, and unconscionable practices in violation of the KCPA:

- a. Defendants manufactured, distributed, marketed, advertised and sold the Seresto Collars, which posed serious safety risks to pets (as evidenced by the thousands of injuries and deaths), and which serious safety risks existed when the Seresto Collars left Defendants’ control and at the point of sale;
- b. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, but omitted and failed to disclose or concealed these risks from consumers;
- c. Defendants knew the serious safety risks posed by the Seresto Collars were unknown to consumers, and would not be easily discovered by Plaintiffs

and the other Class Members, and would defeat their ordinary, foreseeable and reasonable expectations concerning the performance of the Seresto Collars;

- d. Defendants warranted that the Seresto Collars are part of a pet's regular health regimen and provide a safe means of flea and tick prevention, when, in fact, the Seresto Collars pose serious safety risks to pets; and
- e. Defendants represented to consumers, including Plaintiffs and the other Class Members, that the Seresto Collars are safe and fit for the use for which they were intended, despite the fact that Defendants knew, or otherwise should have known, that the Seresto Collars were unsafe and unfit as part of a pet's health regimen, posing serious safety risks to consumers' pets.

139. Contrary to Defendants' warranties and representations that the Seresto Collars were safe and suitable for their intended use, the Seresto Collars, which are marketed as being part of a pet's regular health regimen, are unsafe as designed, manufactured, marketed, and sold. The Seresto Collars posed serious and continuous safety risks to pets.

140. Defendants had exclusive knowledge of material facts concerning the serious safety risks posed by the Seresto Collars to pets.

141. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs and the other Class Members, and their pets based upon: (1) their own internal testing, data, and surveys; (2) numerous consumer complaints lodged directly with Defendants; (3) numerous consumer complaints lodged to retailers; (4) numerous consumer complaints and reports lodged with the EPA; and (5) numerous consumer complaints on online fora.

142. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants actively concealed the serious safety risks from consumers by failing to disclose the serious safety risks to consumers.

143. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants denied the existence of the serious safety risks to pets.

144. Defendants' misrepresentations were material to Plaintiffs' and the other Class Members' decision to purchase the Seresto Collars.

145. Defendants' deceptive acts and practices, including their representations and omissions, were material, in part, because they concerned an essential aspect of the Seresto Collars, including the intended use and safety. Such facts would naturally affect the conduct of purchasers and a reasonable person would have considered those facts to be important in deciding whether to purchase the Seresto Collars. Rather than disclose this information, Defendants marketed and labeled the Seresto Collars as a safe means of flea and tick prevention for pets.

146. Defendants' misrepresentations and omissions regarding the inherently defective and unreasonably dangerous nature of Seresto Collars were and are directed at consumers in a uniform manner.

147. Defendants' violations described herein present a continuing risk to Plaintiffs and the general public. Defendants' unlawful acts and practices complained of herein affect the public interest.

148. Defendants' intended Plaintiffs and other Class Members to rely on the concealment of the risks posed by the Seresto Collars in an effort to encourage sales of Seresto collars.

149. Defendants' actions were negligent, knowing and willful, and/or wanton or reckless with respect to the rights of Plaintiffs and the other Class Members.

150. As a direct and proximate result of Defendant's unlawful practices, Plaintiffs and other Class Members suffered an ascertainable loss of money or property.

151. Defendants' practices described herein were likely to deceive, and did deceive, consumers acting reasonably under the circumstances. Consumers, including Plaintiffs and other Class Members, would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with use of the Collars had been known had they known that the Collars posed serious safety risks to them and their pets.

152. Plaintiffs and the other Class Members seek relief under the KCPA, including but not limited to, injunctive relief, damages, restitution, punitive damages, attorneys' fees, and costs.

THIRD CLAIM FOR RELIEF
VIOLATION OF THE OHIO DECEPTIVE
TRADE PRACTICES ACT (“OHIO DTPA”)

Ohio Rev. Code § 4165, *et seq.*

**(By Plaintiffs Allison Dirk and Heather Hitt
Individually and on Behalf of the Ohio Class against All Defendants)**

153. Plaintiffs Allison Dirk and Heather Hitt reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

154. Defendants are “persons” as defined in Ohio Rev. Code § 4165.01(D).

155. In violation of Ohio Rev. Code § 4165.02(A), Defendants have engaged in a deceptive trade practice by using deceptive representations in connection with goods; representing that goods have sponsorship, approval, characteristics, uses or benefits that they do not have; representing that goods are of a particular standard, quality, or grade when they are of another; and advertising goods with intent not to sell them as advertised.

156. Defendants represented in the Seresto Collar packaging, labeling, marketing, advertising, and promotion that the Seresto Collars provide a safe means of flea and tick prevention for consumers’ pets. Defendants have continued to tout the safety of the Seresto Collars even though the Seresto Collars have been linked to almost 1,700 pet deaths, over 75,000 incidents involving pet harm.

157. Contrary to these representations and omissions, the Seresto Collars pose an unreasonable safety risk to pets.

158. Defendants omitted, concealed, and failed to disclose to consumers that the Seresto Collars pose serious safety risks to pets, including that the Seresto Collars were inherently defective; unreasonably dangerous; not fit to be used for their intended purpose; contained unsafe levels of imidacloprid and flumethrin; and/or caused serious health problems. Rather than disclose this information, Defendants marketed the Seresto Collars as safe for their intended purpose.

159. Defendants engaged in the following deceptive practices in violation of the Ohio DTPA:

- a. Defendants manufactured, distributed, marketed, advertised and sold the Seresto Collars, which posed serious safety risks to pets (as evidenced by the thousands of injuries and deaths), and which serious safety risks existed when the Seresto Collars left Defendants' control and at the point of sale;
- b. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, but omitted and failed to disclose or concealed these risks from consumers;
- c. Defendants knew the serious safety risks posed by the Seresto Collars were unknown to consumers, and would not be easily discovered by Plaintiffs and Class Members, and would defeat their ordinary, foreseeable and reasonable expectations concerning the performance of the Collars;
- d. Defendants warranted that the Seresto Collars are part of a pet's regular health regimen and provide a safe means of flea and tick prevention, when, in fact, the Collars pose serious safety risks to pets; and
- e. Defendants represented to consumers, including Plaintiffs and Class Members, that the Collars are safe and fit for the use for which they were intended, despite the fact that Defendants knew, or otherwise should have known, that the Seresto Collars were unsafe and unfit as part of a pet's health regimen, posing serious safety risks to consumers' pets.

160. Contrary to Defendants' warranties and representations that the Seresto Collars were safe and suitable for their intended use, the Seresto Collars, which are marketed as being part

of a pet's regular health regimen, are unsafe as designed, manufactured, marketed, and sold. The Seresto Collars posed serious and continuous safety risks to pets.

161. Defendants had exclusive knowledge of material facts concerning the serious safety risks posed by the Seresto Collars to pets.

162. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs Dirk and Hitt and Class Members, and their pets based upon: (1) their own internal testing, data, and surveys; (2) numerous consumer complaints lodged directly with Defendants; (3) numerous consumer complaints lodged to retailers; (4) numerous consumer complaints and reports lodged with the EPA; and (5) numerous consumer complaints on online fora.

163. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants actively concealed the serious safety risks from consumers by failing to disclose the serious safety risks to consumers.

164. Despite Defendants' knowledge of material facts concerning the existence of the serious safety risks posed by Seresto Collars, Defendants denied the existence of the serious safety risks to pets.

165. Defendants' misrepresentations were material to Plaintiffs' and Class members' decision to purchase the Seresto Collars.

166. Defendants' deceptive acts and practices, including their representations and omissions, were material, in part, because they concerned an essential aspect of the Seresto Collars, including the intended use and safety. Such facts would naturally affect the conduct of purchasers and a reasonable person would have considered those facts to be important in deciding whether to

purchase the Seresto Collars. Rather than disclose this information, Defendants marketed and labeled the Seresto Collars as a safe means of flea and tick prevention for pets.

167. Defendants' misrepresentations and omissions regarding the inherently defective and unreasonably dangerous nature of Seresto Collars were and are directed at consumers in a uniform manner.

168. Defendants' practices described herein were likely to deceive, and did deceive, consumers acting reasonably under the circumstances. Consumers, including Plaintiffs Dirk and Hitt and Class Members, would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Seresto Collars had been known had they known that the Seresto Collars posed serious safety risks to them and their pets.

169. Defendants' violations described herein present a continuing risk to Plaintiffs Dirk and Hitt and the general public. Defendants' unlawful acts and practices complained of herein affect the public interest.

170. Defendants' unconscionable, deceptive, and/or unfair practices have caused actual damages to Plaintiffs Dirk and Hitt and Class Members who were unaware that the Seresto Collars posed a serious health risk to their pets.

171. As a result of their deceptive trade practices with respect to the Seresto Collars, Defendants have violated the Ohio DTPA, Ohio Rev. Code § 4165.02(A).

172. Defendants' violations of Ohio DTPA have caused Plaintiffs Dirk and Hitt and Class Members actual damages.

173. Plaintiffs Dirk and Hitt and the Ohio Class Members seek damages, as well as declarative and injunctive relief prohibiting Defendants from continuing to engage in deceptive

trade practices, as described herein, in addition to attorneys' fees and costs, and any other relief the Court deems appropriate.

FOURTH CLAIM FOR RELIEF
BREACH OF EXPRESS WARRANTY UNDER INDIANA LAW
(By Plaintiffs Individually and on Behalf of
the Nationwide Class against All Defendants)

174. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

175. Defendants marketed, sold, and/or distributed the Seresto Collars, and Plaintiffs and the other Class Members purchased the Seresto Collars.

176. As fully pleaded above, Defendants had knowledge of the safety risks posed by the Seresto Collars to consumers' pets.

177. Defendants expressly and affirmatively represented and described in their marketing, advertising, and promotion that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets. However, Defendants failed, or otherwise refused, to disclose that the Products posed serious safety risks to pets.

178. The Seresto Collars did not conform to Defendants' representations, descriptions, and warranties that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets, because at all relevant times the Seresto Collars posed serious, continuous safety risks to pets. This constitutes a breach of the Seresto Collars' express warranties that the Seresto Collars were safe.

179. The Seresto Collars purchased by Plaintiffs and the other Class Members did not conform to Defendants' promises and descriptions because:

- a. The Seresto Collars use a dangerous combination of two pesticides, imidacloprid and flumethrin with a unique, synergistic product. In marketing the Seresto Collars, Defendants claim that “[f]lumethrin works together with imidacloprid to provide dual action against fleas and ticks. No other product has this combination of ingredients” and that “[s]tudies show that fleas and ticks are highly susceptible to the combination of imidacloprid and flumethrin found in Seresto.”⁴³ The Seresto Collars’ “unique pharmacological synergism” results in increased toxicity. Defendants knew or should have known of the increased toxicity.
- b. The Seresto Collars release too much of the product too quickly, and Defendants were on notice of this danger.
- c. The Seresto Collars contain a third, undisclosed “tradesecret” ingredient that may be toxic in high doses. This “Tradesecret” chemical can enhance the toxic effects of flumethrin.

180. Whether the dangers stem from the combination of two pesticides (which no other product uses), the amount of pesticide in the collar, or a defective pesticide release technology, Seresto Collars cause significant harm. Given the many complaints issued to Defendants, to government agencies like the EPA, or made publicly online, Defendants knew or should have known Seresto Collars were dangerous to pet health. But Defendants failed to warn the public and, instead, represented that Seresto Collars were safe and effective.

⁴³ www.petbasics.com/our-products/seresto/#additional-resources.

181. These express warranties were necessarily material to Plaintiffs and the other Class Members who would have chosen to purchase a different product if they had possessed knowledge that the Seresto Collars posed safety risks to consumers and their pets.

182. Defendants' express warranties were made to induce Plaintiffs and the other Class Members to purchase the Seresto Collars, which did in fact induce Plaintiffs and Class Members to purchase the Seresto Collars.

183. Plaintiffs and the other Class Members have had sufficient direct dealings with either Defendants or their agents (including distributors, dealers, and authorized sellers) to establish privity of contract between Defendants and Plaintiffs and the other Class Members.

184. Defendants' representations and omissions that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets, while refusing to disclose the serious safety risks posed by the Products to consumers and their pets, became part of the basis of the bargain between Defendants on the one hand, and Plaintiffs and Class Members on the other.

185. At the time that Defendants made these express warranties, it knew the use for which the Seresto Collars were intended, and Defendants expressly warranted that they were fit and safe for their intended purpose.

186. Defendants have received sufficient and timely notice of the breaches of express warranty alleged herein. Despite this notice, and Defendants' knowledge of the breaches and of the true nature of and defect in the Seresto Collars, Defendants have refused to honor their express warranty.

187. Rather than acknowledge their breaches of warranty as described herein, Defendants continue to deny that the Seresto Collars can and have caused serious health risks for pets and continue to represent and describe the Products as a safe means of flea and tick prevention.

188. As a direct and proximate result of Defendants' breaches of their express warranties and their failure to conform to the Seresto Collars' representations and descriptions, Plaintiffs and the other Class Members have been damaged in an amount to be proven at trial. Plaintiffs and the other Class Members have suffered damages in that they did not receive the safe product for which they paid and which Defendants warranted it to be. Plaintiffs and the other Class Members would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Collars had been disclosed.

FIFTH CLAIM FOR RELIEF
BREACH OF EXPRESS WARRANTY UNDER KANSAS LAW
(By Plaintiffs Individually and on Behalf of
the Nationwide Class against All Defendants)

189. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

190. Defendants marketed, sold, and/or distributed the Seresto Collars, and Plaintiffs and the other Class Members purchased the Seresto Collars.

191. As fully pleaded above, Defendants had knowledge of the safety risks posed by the Seresto Collars to consumers' pets.

192. Defendants expressly represented and described in their marketing, advertising, and promotion that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets. However, Defendants failed, or otherwise refused, to disclose that the Products posed serious safety risks to pets.

193. The Seresto Collars did not conform to Defendants' representations, descriptions, and warranties that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets, because at all relevant times the Seresto Collars posed serious, continuous safety risks to pets. This constitutes a breach of the Seresto Collars' express warranties that the Seresto Collars were safe.

194. The Seresto Collars purchased by Plaintiffs and the other Class members did not conform to Defendants' promises and descriptions because:

- a. The Seresto Collars use a dangerous combination of two pesticides, imidacloprid and flumethrin with a unique, synergistic product. In marketing the Seresto Collars, Defendants claim that "[f]lumethrin works together with imidacloprid to provide dual action against fleas and ticks.

No other product has this combination of ingredients” and that “[s]tudies show that fleas and ticks are highly susceptible to the combination of imidacloprid and flumethrin found in Seresto.”⁴⁴ The Seresto Collars’ “unique pharmacological synergism” results in increased toxicity. Defendants knew or should have known of the increased toxicity.

- b. The Seresto Collars release too much of the product too quickly, and Defendants were on notice of this danger.
- c. The Seresto Collars contain a third, undisclosed “tradesecret” ingredient that may be toxic in high doses. This “Tradesecret” chemical can enhance the toxic effects of flumethrin.

195. Whether the dangers stem from the combination of two pesticides (which no other product uses), the amount of pesticide in the collar, or a defective pesticide release technology, Seresto Collars cause significant harm. Given the many complaints issued to Defendants, to government agencies like the EPA, or made publicly online, Defendants knew or should have known Seresto Collars were dangerous to pet health. But Defendants failed to warn the public and, instead, represented that Seresto Collars were safe and effective.

196. These express warranties were necessarily material to Plaintiffs and the other Class Members who would have chosen to purchase a different product if they had possessed knowledge that the Seresto Collars posed safety risks to consumers and their pets.

197. Defendants’ express warranties were made to induce Plaintiffs and the other Class Members to purchase the Seresto Collars, which did in fact induce Plaintiffs and the other Class Members to purchase the Seresto Collars.

⁴⁴ www.petbasics.com/our-products/seresto/#additional-resources.

198. Plaintiffs and the other Class Members have had sufficient direct dealings with either Defendants or their agents (including distributors, dealers, and authorized sellers) to establish privity of contract between Defendants and Plaintiffs and the other Class Members.

199. Defendants' representations and omissions that the Seresto Collars provided a safe means of flea and tick prevention for consumers' pets, while refusing to disclose the serious safety risks posed by the Products to consumers and their pets, became part of the basis of the bargain between Defendants on the one hand, and Plaintiffs and the other Class Members on the other.

200. At the time that Defendants made these express warranties, it knew the use for which the Seresto Collars were intended, and Defendants expressly warranted that they were fit and safe for their intended purpose.

201. Defendants have received sufficient and timely notice of the breaches of express warranty alleged herein. Despite this notice, and Defendants' knowledge of the breaches and of the true nature of and defect in the Seresto Collars, Defendants have refused to honor their express warranty.

202. Rather than acknowledge their breaches of warranty as described herein, Defendants continue to deny that the Seresto Collars can and have caused serious health risks for pets and continue to represent and describe the Products as a safe means of flea and tick prevention.

203. As a direct and proximate result of Defendants' breaches of their express warranties and their failure to conform to the Seresto Collars' representations and descriptions, Plaintiffs and the other Class Members have been damaged in an amount to be proven at trial. Plaintiffs and the other Class Members have suffered damages in that they did not receive the safe product for which they paid and which Defendants warranted it to be. Plaintiffs and the other Class Members would

not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Collars had been disclosed.

SEVENTH CLAIM FOR RELIEF
BREACH OF EXPRESS WARRANTY
(By Plaintiffs Individually and on
Behalf of the Proposed Ohio State Class against All Defendants)

204. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

205. Ohio has adopted the Uniform Commercial Code, including U.C.C. § 2-313, which covers express warranties. That section provides that “any affirmation of fact or promise made by the seller to the buyer which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods shall conform to the affirmation or promise.” U.C.C. § 2-313(1)(a). Further, “[a]ny description of the goods which is made part of the basis of the bargain creates an express warranty that the good shall conform to the description.” *Id.* § 2-313(1)(b).

206. Defendants marketed, sold, and/or distributed the Seresto Collars, and Plaintiffs and the other Class Members purchased the Seresto Collars.

207. Defendants represented and described in their marketing, advertising, and promotion of the Seresto Collars that their Products provided a safe means of flea and tick prevention for consumers’ pets. However, Defendants failed, or otherwise refused, to disclose that the Products posed serious safety risks to consumers and their pets.

208. Defendants made these representations to induce Plaintiffs and the other Class Members to purchase the Seresto Collars, which did in fact induce Plaintiffs and the other Class Members to purchase these Products.

209. Accordingly, Defendants’ representations and omissions that the Seresto Collars provided a safe means of flea and tick prevention for consumers’ pets, while refusing to disclose

the serious safety risks posed by the Products to consumers and their pets, became part of the basis of the bargain between Defendants on the one hand, and Plaintiffs and the other Class Members on the other.

210. The Seresto Collars did not conform to Defendants' representations, descriptions, and warranties that the Products provided a safe means of flea and tick prevention for consumers' pets, because at all relevant times the Seresto Collars posed serious, continuous safety risks to pets. This constitutes a breach of the Products' express warranties.

211. Defendants have received sufficient and timely notice of the breaches of express warranty alleged herein. Despite this notice, and Defendants' knowledge of the breaches and of the true nature of and defect in the Seresto Collars, Defendants have refused to honor their express warranty.

212. Rather than acknowledge their breaches of warranty as described herein, Defendants continue to deny that the Seresto Collars can and have caused serious health risks for pets, and continue to represent and describe the Products as a safe means of flea and tick prevention.

213. As a direct and proximate result of Defendants' breaches of their express warranties and their failure to conform to the Seresto Collars' representations and descriptions, Plaintiffs and the other Class Members have been damaged in an amount to be proven at trial. Plaintiffs and the other Class Members have suffered damages in that they did not receive the safe product for which they paid and which Defendants warranted it to be. Plaintiffs and the other Class Members would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Collars had been disclosed.

SEVENTH CLAIM FOR RELIEF
BREACH OF IMPLIED WARRANTY
(By Plaintiffs Individually and on
Behalf of the Proposed Ohio Class against All Defendants)

214. Plaintiffs reasserts the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

215. Ohio has adopted the Uniform Commercial Code, including U.C.C. § 2-314, which covers the implied warranty of merchantability. That section provides that “a warranty that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind.” U.C.C. § 2-314(1).

216. At all relevant times, Defendants were merchants with respect to Seresto Collars, which were sold to Plaintiffs and the other Class Members, and Defendants were in the business of selling such products.

217. Each Seresto Collar sold by Defendants came with an implied warranty that it would be merchantable and fit for the ordinary purpose for which such a product would be used, including impliedly warranting on the labels for their Seresto Collars that the Products were merchantable and fit for the ordinary purposes for which they were sold—namely, as a safe means of flea and tick prevention for consumers’ pets.

218. Defendants marketed, sold, and/or distributed the Seresto Collars, and Plaintiffs and the other Class Members purchased the Seresto Collars.

219. Defendants breached their implied warranty of merchantability pursuant to U.C.C. § 2-314 because the Seresto Collars were not safe and posed serious safety risks to pets, thereby failing of their ordinary and intended purpose.

220. When Defendants sold the Seresto Collars, the products were unsafe, were not merchantable, did not pass without objection in the trade as a safe flea and tick preventative for

pets, were not of adequate quality within that description, were not fit for the ordinary purposes for which such goods are used, were not adequately labeled, and did not conform to the promises or affirmations of fact made on the container or label. *See* U.C.C. § 2-314(2).

221. Ohio has adopted the Uniform Commercial Code, including U.C.C. § 2-315, which covers the implied warranty of fitness for particular purpose. That section provides that “where the seller . . . has reason to know any particular purpose for which the goods are required and that the buyer is relying on the seller’s skill or judgment to select or furnish suitable goods, there is . . . an implied warranty that the goods shall be fit for such purpose” U.C.C. § 2-315.

222. Each Seresto Collar sold by Defendants came with an implied warranty that it would be suitable and appropriate for a particular purpose: to provide a safe flea and tick prevention for consumers’ pets. Defendants marketed, sold, and/or distributed the Seresto Collars for this particular purpose.

223. Plaintiffs and the other Class Members purchased the Seresto Collars for a particular purpose: to prevent flea and tick infestations of their pets and to provide such protection in a safe manner.

224. At all relevant times, Defendants had advanced skills and judgment relating to Seresto Collars based on their knowledge and experience gained through years of designing, developing, and testing Seresto Collars and similar products intended for use on and by pets. At all relevant times, Defendants were in a better position of skill, judgment, knowledge, and experience as sellers of Seresto Collars than of those consumers who would consider purchasing, or would purchase the Seresto Collars.

225. Plaintiffs and the other Class Members relied on Defendants’ skill, judgment, knowledge, and experience relating to Seresto Collars in selecting the Products for purchase.

Likewise, Plaintiffs and the other Class Members relied on Defendants to use their skill, judgment, knowledge, and experience in furnishing the Seresto Collars to consumers for purchase and use.

226. Defendants had reason to know that Plaintiffs and the other Class Members were likely to purchase and would purchase, the Seresto Collars for this particular purpose—to provide a safe means of flea and tick prevention for their pets. Further, Defendants had reason to know that Plaintiffs and the other Class Members were likely to rely on their advanced skill, judgment, knowledge, and experience relating to Seresto Collars in selecting the products for sale and furnishing safe products for purchase by consumers and for use on and by pets.

227. When Defendants sold the Seresto Collars, the products were unsafe and were not fit for the particular purchase for which they were purchased—namely, as a safe means of flea and tick prevention for consumers’ pets.

228. Defendants breached their implied warranty of fitness for a particular purpose pursuant to U.C.C. § 2-315 because the Seresto Collars were not safe and posed serious safety risk to pets, thereby failing the particular purpose for which they were sold and purchased.

229. The Seresto Collars are not fit for their intended use—or any use—because they have dangerous propensities when used as intended and pose serious safety risks to pets.

230. Plaintiffs and the other Class Members have had sufficient direct dealings with either Defendants or their agents (including distributors, dealers, and authorized sellers) to establish privity of contract between Defendants and Plaintiffs and the other Class Members.

231. Further, Plaintiffs and the other Class Members were intended third-party beneficiaries of the implied warranty of merchantability made by Defendants to purchasers of Seresto Collars.

232. As a direct and proximate result of Defendants' breaches of (1) the implied warranties of merchantability and (2) the implied warranties of fitness for a particular purpose, Plaintiffs and the other Class Members have been damaged in an amount to be proven at trial. Plaintiffs and the other Class Members have suffered damages in that they did not receive (1) the merchantable product that was fit for its ordinary purpose for which they paid and which Defendants warranted it to be, and (2) a product that was fit for the particular purpose for which they paid and which Defendants warranted it to be. Plaintiffs and the other Class Members would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Seresto Collars had been disclosed.

EIGHTH CLAIM FOR RELIEF
VIOLATION OF THE MAGNUSON-MOSS WARRANTY ACT
15 U.S.C. § 2301, *et seq.*
(By Plaintiffs Individually and on
Behalf of the Nationwide Class against All Defendants)

233. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

234. The Magnuson-Moss Warranty Act (“MMWA”) provides a cause of action for any consumer who is damaged by the failure of a warrantor to comply with a written or implied warranty. 15 U.S.C. § 2310(d)(1).

235. The amount in controversy of Plaintiffs’ individual claims meets or exceeds the sum of value of \$25.00. Further, the amount in controversy, computed on the basis of all claims to be determined in this Action, meets or exceeds the sum or value of \$50,000.00. *See* 15 U.S.C. § 2310(d)(3).

236. The Seresto Collars are “consumer products” because they are “tangible personal property which is distributed in commerce” and are “normally used for personal, family, or household purposes,”—namely, as a safe means of flea and tick prevention for consumers’ pets. 15 U.S.C. § 1301(1).

237. Plaintiffs and the other Class Members are “consumers” because they bought the Seresto Collars for use with their pets. 15 U.S.C. § 1301(3). Plaintiffs and the other Class Members are “consumers” within the meaning of 15 U.S.C. § 1301(3).

238. Defendants are “suppliers” because they “engaged in the business of making a consumer product directly or indirectly available to consumers” through their marketing and selling of the Seresto Collars to consumers, including Plaintiffs and the other Class Members. 15 U.S.C. § 2301(4).

239. Defendants are “warrantors” because they “[gave] . . . a written warranty” and were otherwise “obligated under an implied warranty” to consumers, including Plaintiffs and the other Class Members, who purchased the Seresto Collars. 15 U.S.C. § 2301(5).

240. Defendants provided an express warranty for each Seresto Collar sold. This express warranty constitutes a “written warranty” because it is a “written affirmation of fact or written promise made in connection with the sale of [the Seresto Collar] by a supplier to a buyer” relating to the nature of the Product, affirming that the Seresto Collar is “defect free” and “will meet a specified level of performance over a specified period of time”—namely, that the Seresto Collars were a safe means of flea and tick prevention for consumers’ pets for the stated duration. 15 U.S.C. § 2301(6)(A). The express warranty became a part of the basis of the bargain between Defendants and Plaintiffs and the other Class Members upon purchase, because the representations and descriptions of the Products were intended to induce, and did in fact induce, Plaintiffs and the other Class Members to purchase the Seresto Collars. *Id.* § 2301(6).

241. Defendants represented and described in their marketing, advertising, and promotion of the Seresto Collars that their Products provided a safe means of flea and tick prevention for consumers’ pets. However, Defendants failed, or otherwise refused, to disclose that the Products posed serious safety risks to consumers and their pets.

242. The Seresto Collars did not conform to Defendants’ representations, descriptions, and warranties that the Products provided a safe means of flea and tick prevention for consumers’ pets, because at all relevant times the Seresto Collars posed serious, continuous safety risks to pets. This constitutes a breach of the Products’ express warranties.

243. Further, Defendants provided the implied warranties of merchantability and fitness for a particular purpose for each Seresto Collar sold. 15 U.S.C. § 2301(7).

244. Each Seresto Collar sold by Defendants came with an implied warranty that it would be merchantable and fit for the ordinary purpose for which such a product would be used, including impliedly warranting on the labels for their Seresto Collars that the Products were merchantable and fit for the ordinary purposes for which they were sold—namely, as a safe means of flea and tick prevention for consumers’ pets.

245. Defendants breached their implied warranty of merchantability because the Seresto Collars were not safe and posed serious safety risks to pets, thereby failing their ordinary and intended purpose.

246. Each Seresto Collar sold by Defendants came with an implied warranty that it would be suitable and appropriate for a particular purpose: to provide a safe flea and tick prevention for consumers’ pets. Defendants marketed, sold, and/or distributed the Seresto Collars for this particular purpose, and Plaintiffs and the other Class Members purchased the Seresto Collars for this particular purpose.

247. Defendants breached their implied warranty of fitness for particular purpose because the Seresto Collars were not safe and posed serious safety risk to pets, thereby failing the particular purpose for which they were sold and purchased.

248. The Seresto Collars are not fit for their intended use—or any use—because they have dangerous propensities when used as intended and pose serious safety risks to pets.

249. Defendants have been afforded a reasonable opportunity to cure their breaches of these warranties but have refused to do so. Despite these warranties, Defendants have not replaced the Seresto Collars with non-defective, safe alternatives and have refused to reimburse Plaintiffs and the other Class Members. In fact, Defendants have continuously denied that the Seresto Collars are unsafe, dangerous, or defective.

250. Further, Plaintiffs and the other Class Members have provided sufficient notice to Defendants. Plaintiffs have already provided Defendants with an MMWA notice letter. This notice provided Defendants further opportunity to cure their breaches of these warranties, but Defendants have refused to do so.

251. Plaintiffs and the other Class Members have had sufficient direct dealings with either Defendants or their agents (including distributors, dealers, and authorized sellers) to establish privity of contract between Defendants and Plaintiffs and the other Class Members.

252. Further, Plaintiffs were intended third-party beneficiaries of the implied warranty of merchantability made by Defendants to purchasers of Seresto Collars.

253. As a direct and proximate result of Defendants' breaches of (1) the express warranty, (2) the implied warranties of merchantability, and (3) the implied warranties of fitness for a particular purpose, Plaintiffs and the other Class Members have been damaged in an amount to be proven at trial. Plaintiffs and the other Class Members have suffered damages in that they did not receive (1) the safe product for which they paid and which Defendants warranted it to be, (2) the merchantable product that was fit for its ordinary purpose for which they paid and which Defendants warranted it to be, and (3) a product that was fit for the particular purpose for which they paid and which Defendants warranted it to be. Plaintiffs and the other Class Members would not have purchased the Seresto Collars on the same terms if the true facts concerning the risks associated with the use of the Seresto Collars had been disclosed. Defendants' breaches of these warranties have deprived Plaintiffs and the other Class Members of the benefit of their bargain.

NINTH CLAIM FOR RELIEF
STRICT LIABILITY – DESIGN DEFECT
(By Plaintiffs Individually and on
Behalf of the Ohio State Class against All Defendants)

254. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above and incorporate such allegations by reference herein.

255. Plaintiffs bring this strict liability claim against Defendants for defective design.

256. Defendants are liable to Plaintiffs and the other Class Members under a product liability theory for marketing a defectively-designed product, as well as for failing to adequately warn of the risk of severe neurological injury caused by the chronic exposure to Seresto.

257. The Seresto Collars, which Defendants designed, tested, manufactured, distributed, and sold, did not perform safely as an ordinary consumer would have expected them to perform when used in the intended or a reasonably foreseeable manner, in that:

258. As designed, manufactured, formulated, and packaged, the chemicals in the Seresto Collars were likely to be inhaled, ingested, and absorbed into the bodies of the pets who used it, and/or released in too large or too quick a dosage; and

- a. When inhaled, ingested, or absorbed, it was likely to cause neurological damage and injury that was both permanent and cumulative, and repeated exposure were likely to cause neurological events, including seizures.

259. At all times relevant to this litigation, Defendants engaged in the business of testing, developing, manufacturing, selling, distributing, marketing, packaging design, and promoting of the Seresto Collars, which are defective and unreasonably dangerous to consumers, including Plaintiffs and the other Class Members, thereby placing the Seresto Collars into the stream of commerce, including Plaintiffs' home state. These actions were under the ultimate control and supervision of Defendants.

260. At all times relevant, Defendants designed, researched, developed, manufactured, produced, tested, assembled, labeled, advertised, promoted, marketed, sold, and distributed the Seresto Collars used by Plaintiffs and the other Class Members, as described above.

261. At all times relevant, the Seresto Collars were manufactured, designed, and labeled in an unsafe, defective, and inherently dangerous manner that was dangerous for use by or exposure to the public, and, in particular, Plaintiffs and the other Class Members.

262. At all times relevant to this litigation, the Seresto Collars reached the intended consumers, handlers, and users or other persons coming into contact with these products in Plaintiffs' home state and throughout the United States, including Plaintiffs and the other Class Members, without substantial change in their condition as designed, manufactured, sold, distributed, labeled, and marketed by Defendants.

263. The Seresto Collars, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold, and marketed by Defendants were defective in design and formulation in that when they left the hands of the manufacturers and/or suppliers, they were unreasonably dangerous and dangerous to an extent beyond that which an ordinary consumer would contemplate.

264. The Seresto Collars, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold, and marketed by Defendants were defective in design and formulation in that when they left the hands of the manufacturers and/or suppliers, the foreseeable risks exceeded the alleged benefits associated with their design and formulation.

265. At all times relevant, Defendants knew or had reason to know that the Seresto Collars were defective and were inherently dangerous and unsafe when used in the manner instructed and provided by Defendants.

266. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs' and other Class Members' pets, based upon: (1) their own internal testing, data and surveys, (2) numerous consumer complaints lodged directly with Defendants, (3) numerous consumer complaints lodged to retailers, (4) numerous consumer complaints and reports lodged with the EPA, and (5) numerous consumer complaints on online fora.

267. Defendants omitted, concealed, and failed to disclose to consumers that the Seresto Collars pose serious safety risks to pets, including that the Seresto Collars were inherently defective; unreasonably dangerous; not fit to be used for their intended purpose; contained unsafe levels of imidacloprid and flumethrin; and/or caused serious health problems. Rather than disclose this information, Defendants marketed the Seresto Collars as safe for their intended purpose.

268. Defendants products were defectively designed in that the risk of danger inherent in the synergistic effect of imidacloprid + flumethrin, as described herein, outweighed the benefits of the design, considering, among other relevant factors, the gravity of the danger posed by the challenged design, the likelihood that such danger would occur, the mechanical feasibility of a safer alternative design, the financial cost of an improved design, and the adverse consequences to the product and to the consumer that would result from the alternative design.

269. Therefore, at all times relevant, the Seresto Collars, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold, and marketed by Defendants were defective in design and formulation in one or more of the following ways:

- a. When placed in the stream of commerce, the Seresto Collars products were defective in design and formulation and, consequently, dangerous to an extent beyond that which an ordinary consumer would contemplate;

- b. When placed in the stream of commerce, the Seresto Collars were unreasonably dangerous in that they were hazardous and posed a grave risk of central nervous system injuries and other serious illnesses, as described herein, when used in a reasonably anticipated manner;
- c. When placed in the stream of commerce, the Seresto Collars contained unreasonably dangerous design defects and were not reasonably safe when used in a reasonably anticipated or intended manner;
- d. Defendants did not sufficiently test, investigate, or study the Seresto Collars and, specifically, the active ingredients imidacloprid and flumethrin;
- e. Exposure to Seresto Collars presents a risk of harmful side effects that outweigh any potential utility stemming from the use of the pesticide;
- f. At the time of marketing their Seresto Collars, the Seresto Collars were defective in that exposure to and/or use of the Seresto Collars, as described herein, could result increase risk of central nervous system injury and other severe illnesses and injuries to pets;
- g. Defendants did not conduct adequate post-marketing surveillance of their the Seresto Collars; and
- h. Defendants could have employed safer alternative designs and formulations.

270. Plaintiffs' and the other Class Members' pets were exposed to the Seresto Collars, as described above, without knowledge of their dangerous characteristics.

271. At all times relevant, Plaintiffs' and the other Class Members' pets were exposed to the use of the Seresto Collars in an intended or reasonably foreseeable manner without knowledge of their dangerous characteristics.

272. Plaintiffs and the other Class Members could not have reasonably discovered the defects and risks associated with the Seresto Collars before or at the time of exposure.

273. The harm caused by the Seresto Collars far outweighed their benefit, rendering these products dangerous to an extent beyond that which an ordinary consumer would contemplate. The Seresto Collars were and are more dangerous than alternative products and Defendants could have designed the Seresto Collars (including their packaging and sales aids) to make them less dangerous. Indeed, when Defendants designed the Seresto Collars, the state of the industry's scientific knowledge was such that a less risky design or formulation was attainable.

274. At the time the Seresto Collars left Defendant's control, there was a practical, technically feasible, and safer alternative design that would have prevented the harm without substantially impairing the reasonably anticipated or intended function of those pesticides.

275. Defendant's defective design of the Seresto Collars was willful, wanton, fraudulent, malicious, and conducted with reckless disregard for the health and safety of users of the Seresto Collars, including Plaintiffs and the other Class Members.

276. Therefore, as a result of the unreasonably dangerous condition of the Seresto Collars, Defendants are strictly liable to Plaintiffs and the other Class Members.

277. The defects in the Seresto Collars caused or contributed to cause injuries and damages to Plaintiffs' and the other Class Members' pets, and, but for Defendants' misconduct and omissions, Plaintiffs' and the other Class Members' pets would not have sustained their injuries.

278. Defendants' conduct, as described above, was reckless. Defendants risked the lives of pets using these products, including Plaintiffs' and the other Class Members' pets, with knowledge of the safety problems associated with the Seresto Collars and the toxic combination of imidacloprid and flumethrin present. Defendants suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.

279. As a direct and proximate result of Defendants' placing defective Seresto Collars into the stream of commerce, Plaintiffs' and the other Class Members' pets have suffered and continue to suffer grave injuries and have endured physical pain and discomfort, as well as economic hardship, including considerable financial expenses for medical care, and treatment.

TENTH CLAIM FOR RELIEF
STRICT LIABILITY – FAILURE TO WARN
(By Plaintiffs Individually and on
Behalf of the Ohio State Class against All Defendants)

280. Plaintiffs reassert the allegations set forth in the factual allegations paragraphs above incorporate such allegations by reference herein.

281. Plaintiffs bring this strict liability claim against Defendants for failure to warn.

282. At all times relevant, Defendants engaged in the business of testing, developing, designing, manufacturing, marketing, selling, distributing, and promoting the Seresto Collars, which are defective and unreasonably dangerous to consumers' pets, including Plaintiffs' and the other Class Members' pets, because they do not contain adequate warnings or instructions concerning the dangerous characteristics of the Seresto Collars and specifically, the synergistic effects of the active ingredients imidacloprid and flumethrin. These actions were under the ultimate control and supervision of Defendants.

283. Defendants researched, developed, designed, tested, manufactured, inspected, labeled, distributed, marketed, promoted, sold, and otherwise released into the stream of commerce the Seresto Collars, and in the course of same, directly advertised or marketed the products to consumers and end users, including the Plaintiffs and the other Class Members, and therefore had a duty to warn of the risks associated with the use of the Seresto Collars and the synergistic effects of imidacloprid and flumethrin.

284. At all times relevant to this litigation, Defendants had a duty to properly test, develop, design, manufacture, inspect, package, label, market, promote, sell, distribute, maintain supply, provide proper warnings, and take such steps as necessary to ensure that the Seresto Collars did not cause users and consumers to suffer from unreasonable and dangerous risks. Defendants had a continuing duty to warn Plaintiffs and the other Class Members of the dangers associated

with the Seresto Collars' use and exposure. Defendants, as manufacturer, seller, promoter, marketer, or distributor of pesticides are held to the knowledge of an expert in the field.

285. At the time of manufacture, Defendants could have provided the warnings or instructions regarding the full and complete risks of the Seresto Collars and imidacloprid/flumethrin-containing products because they knew, or otherwise should have known, of the unreasonable risks of harm associated with the use of and/or exposure to such products.

286. At all times relevant to this litigation, Defendants failed to investigate, study, test, or promote the safety or to minimize the dangers to users and consumers of its product and to those who would foreseeably use or be harmed by these pesticides, including Plaintiffs and the other Class Members.

287. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs and Class Members, and their pets based upon: (1) their own internal testing, data, and surveys; (2) numerous consumer complaints lodged directly with Defendants; (3) numerous consumer complaints lodged to retailers; (4) numerous consumer complaints and reports lodged with the EPA; and (5) numerous consumer complaints on online fora.

288. Defendants omitted, concealed, and failed to disclose to consumers that the Seresto Collars pose serious safety risks to pets, including that the Seresto Collars were inherently defective; unreasonably dangerous; not fit to be used for their intended purpose; contained unsafe levels of imidacloprid and flumethrin; and/or caused serious health problems. Rather than disclose this information, Defendants marketed the Seresto Collars as safe for their intended purpose.

289. Even though Defendants knew or should have known that the Seresto Collars posed a grave risk of harm, they failed to exercise reasonable care to warn of the dangerous risks

associated with their use and exposure. The dangerous propensities of these products and the toxic characteristics of the synergistic effects of their ingredients, as described above, were known to Defendants, or scientifically knowable to Defendants through appropriate research and testing by known methods, at the time they distributed, marketed, promoted, supplied or sold the products, and not known to end users and consumers, such as Plaintiffs and Class Members.

290. These products created significant risks of serious harm to consumers' pets, as alleged herein, and Defendants failed to adequately warn consumers and reasonably foreseeable users of the risks of exposure to its products by their pets. Defendants have wrongfully concealed information concerning the dangerous nature of the Seresto Collars and its active ingredients imidacloprid and flumethrin, and further made false and/or misleading statements concerning the safety of the Seresto Collars and imidacloprid combined with flumethrin.

291. At all times relevant, the Seresto Collars reached the intended consumers, handlers, and users or other persons coming into contact with these products in Plaintiffs' home states and throughout the United States, including Plaintiffs, without substantial change in their condition as designed, manufactured, sold, distributed, labeled, promoted, and marketed by Defendants.

292. Plaintiffs' and Class Members' pets were exposed to the Seresto Collars in the course of their use for flea and tick protection, without Plaintiffs' and Class Members' knowledge of their dangerous characteristics to their pets.

293. At all times relevant, Plaintiffs' and the other Class Members' pets used and/or were exposed to the Seresto Collars in their intended or reasonably foreseeable manner without Plaintiffs' and Class Members' knowledge of their dangerous characteristics to their pets.

294. Plaintiffs and the other Class Members could not have reasonably discovered the defects and risks associated with the Seresto Collars or imidacloprid/flumethrin-containing

products prior to or at the time of Plaintiffs' and the other Class Members' pets' exposure. Plaintiffs and the other Class Members relied upon the skill, superior knowledge, and judgment of Defendants.

295. The Seresto Collars are defective because the minimal warnings disseminated with the Seresto Collars were inadequate; they failed to communicate adequate information on the dangers and safe use/exposure; and they failed to communicate warnings and instructions that were appropriate and adequate to render the products safe for their ordinary, intended, and reasonably foreseeable uses, including preventing flea and ticks on pets.

296. The information that Defendants did provide or communicate failed to contain relevant warnings, hazards, and precautions that would have enabled consumers, including Plaintiffs and the other Class Members, to utilize the products safely and with adequate protection. Instead, Defendants disseminated information that was inaccurate, false, and misleading and which failed to communicate accurately or adequately the comparative severity, duration, and extent of the risk of injuries with use of and/or exposure to the Seresto Collars; continued to aggressively promote the efficacy of their products, even after they knew, or otherwise should have known, of the unreasonable risks from use of or exposure to the Seresto Collars; and concealed, downplayed, or otherwise suppressed, through aggressive marketing and promotion, any information or research about the risks and dangers of exposure to the Seresto Collars.

297. To this day, Defendants have failed to adequately and accurately warn of the true risks of Plaintiffs' and the other Class Members' injuries associated with the use of and exposure to the Seresto Collars and its active ingredients imidacloprid and flumethrin, a probable central nervous system toxin. In fact, Defendants continue to actively deny that the Seresto Collars pose any risk to consumers' pets.

298. As a result of their inadequate warnings, the Seresto Collars were defective and unreasonably dangerous when they left the possession and/or control of Defendants, were distributed, marketed, and promoted by Defendants, and used by Plaintiffs and the other Class Members on their pets.

299. Defendants are liable to Plaintiffs and the other Class Members for injuries suffered by their pets caused by Defendants' negligent or willful failure, as described above, to provide adequate warnings or other clinically relevant information and data regarding the appropriate use of these products and the risks associated with the use of or exposure to the Seresto Collars.

300. The defects in the Seresto Collars caused or contributed to cause Plaintiffs' and Class members' pets' injuries and damages, and, but for this misconduct and omissions, Plaintiffs' and Class Members' pets would not have sustained their injuries and damages.

301. Had Defendants provided adequate warnings and instructions and properly disclosed and disseminated the risks associated with the Seresto Collars, Plaintiffs could have avoided the risk of developing injuries as alleged herein.

302. As a direct and proximate result of Defendants placing defective Seresto Collars into the stream of commerce, Plaintiffs' and the other Class Members' pets have suffered severe injuries and have endured physical pain and discomfort, and Plaintiffs and the other Class Members have experienced financial hardship, including considerable financial expenses for veterinary care and treatment of their pets.

ELEVENTH CLAIM FOR RELIEF
NEGLIGENCE

**(By Plaintiffs Individually and on
Behalf of the Nationwide Class and Ohio State Class against All Defendants)**

303. Plaintiffs reasserts the allegations set forth in the factual allegation paragraphs above and incorporate such allegations by reference herein.

304. Defendants, directly or indirectly, caused the Seresto Collars to be sold, distributed, packaged, labeled, marketed, promoted, and/or used by Plaintiffs and the other Class Members.

305. At all times relevant, Defendants had a duty to exercise reasonable care in the design, testing, research, manufacture, marketing, advertisement, supply, promotion, packaging, sale, and distribution of the Seresto Collars, including the duty to take all reasonable steps necessary to manufacture, promote, and/or sell a product that was not unreasonably dangerous to consumers and users of the product.

306. At all times relevant, Defendants had a duty to exercise reasonable care in the marketing, advertisement, and sale of the Seresto Collars. Defendant's duty of care owed to consumers and the general public included providing accurate, true, and correct information concerning the risks of using the Seresto Collars and appropriate, complete, and accurate warnings concerning the potential adverse effects of exposure to the Seresto Collars, and, in particular, its active ingredients imidacloprid and flumethrin.

307. At all times relevant, Defendants knew or, in the exercise of reasonable care, should have known of the hazards and dangers the Seresto Collars and, specifically, the neurotoxic properties of the chemicals imidacloprid and flumethrin.

308. Defendants knew, or otherwise should have known, that the Seresto Collars posed serious safety risks to pets, including Plaintiffs and the other Class Members, and their pets based upon: (1) their own internal testing, data, and surveys; (2) numerous consumer complaints lodged

directly with Defendants; (3) numerous consumer complaints lodged to retailers; (4) numerous consumer complaints and reports lodged with the EPA; and (5) numerous consumer complaints on online fora.

309. Accordingly, at all times relevant, Defendants knew or, in the exercise of reasonable care, should have known that use of or exposure to the Seresto Collars could cause or be associated with Plaintiffs' and the other Class Members' pets' injuries and thus created a dangerous and unreasonable risk of injury to the users of these products, including Plaintiffs' and the other Class Members' pets.

310. Defendants also knew or, in the exercise of reasonable care, should have known that users and consumers of the Seresto Collars were unaware of the risks and the magnitude of the risks associated with use of and/or exposure to the Seresto Collars and imidacloprid and flumethrin-containing products.

311. Defendants omitted, concealed, and failed to disclose to consumers that the Seresto Collars pose serious safety risks to pets, including that the Seresto Collars were inherently defective; unreasonably dangerous; not fit to be used for their intended purpose; contained unsafe levels of imidacloprid and flumethrin; and/or caused serious health problems. Rather than disclose this information, Defendants marketed the Seresto Collars as safe for their intended purpose.

312. As such, Defendants breached the duty of reasonable care and failed to exercise ordinary care in the design, research, development, manufacture, testing, marketing, supply, promotion, advertisement, packaging, sale, and distribution of the Seresto Collars, in that Defendants manufactured, marketed, promoted, and sold defective pesticides based collars containing the chemicals imidacloprid and flumethrin, knew or had reason to know of the defects inherent in these products, knew or had reason to know that a user's or consumer's pet's exposure

to the products created a significant risk of harm and unreasonably dangerous side effects to the pet, and failed to prevent or adequately warn of these risks and injuries.

313. In breach of their duties, Defendants negligently:

- a. Failed to design, manufacturer, formulate, and package the Seresto Collars to make them unlikely to be inhaled and absorbed into the bodies of the animals who used them, and their owners;
- b. Designed, manufactured, and formulated the Seresto Collars such that it was likely to cause neurological damage that was both permanent and cumulative injury to Class Members' pets, and repeated exposures were likely to cause clinically significant neurological injury;
- c. Failed to conduct adequate research and testing to determine the extent to which exposure to the Seresto Collars was likely to occur through inhalation, ingestion, and absorption into the bodies of animals who used it;
- d. Failure to conduct adequate research and testing to determine the extent to which the Seresto Collars were likely to cause or contribute to causing latent neurological damage that was both permanent and cumulative and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurological injuries; and
- e. Failed to warn that the Seresto Collars could have caused injuries to pets. causing neurologic injury that was both permanent and cumulative.

314. Despite an ability and means to investigate, study, and test the Seresto Collars and to provide adequate warnings, Defendants have failed to do so. Indeed, Defendants have

wrongfully concealed information and have further made false and/or misleading statements concerning the safety and/or exposure to the Seresto Collars and imidacloprid and flumethrin.

315. Defendants were negligent in the following respects:

- a. Manufacturing, producing, promoting, formulating, creating, developing, designing, selling, and/or distributing the Seresto Collars without thorough and adequate pre-and post-market testing;
- b. Manufacturing, producing, promoting, formulating, creating, developing, designing, selling, and/or distributing the Seresto Collars while negligently and/or intentionally concealing and failing to disclose the results of trials, tests, and studies of exposure to imidacloprid combined with flumethrin, and, consequently, the risk of serious harm associated with use of and exposure to the Seresto Collars;
- c. Failing to undertake sufficient studies and conduct necessary testing and adverse event analysis to determine whether the Seresto Collars and imidacloprid and flumethrin-containing products were safe for their intended use in flea and tick control on dogs and cats;
- d. Failing to use reasonable and prudent care in the design, research, manufacture, and development of the Seresto Collars to avoid the risk of serious harm associated with the prevalent use of the Seresto Collars as a pesticide;
- e. Failing to design, test, and manufacture the Seresto Collars to ensure they were at least as safe and effective as other pesticides on the market;

- f. Failing to provide adequate instructions, guidelines, and safety precautions to those consumers and their pets who Defendants could reasonably foresee would use and be exposed to the Seresto Collars;
- g. Failing to disclose to Plaintiffs, Class Members, users/consumers, and the general public that use of and exposure to the Seresto Collars presented severe risks of central nervous system injury and other grave illnesses;
- h. Failing to warn Plaintiffs and Class Members, consumers, and the general public that the Seresto Collars' risk of harm was unreasonable and that there were safer and effective alternative pesticides available to Plaintiffs and other consumers;
- i. Systematically suppressing or downplaying contrary evidence about the risks, incidence, and prevalence of the side effects of the Seresto Collars and imidacloprid + flumethrin;
- j. Representing that their Seresto Collars were safe for their intended use when, in fact, Defendants knew or should have known that the products were not safe for their intended purpose;
- k. Failing to make and/or submit any changes to the Seresto Collars' labeling or other promotional materials that would alert the consumers and the general public of the risks of the Seresto Collars and imidacloprid combined with flumethrin;
- l. Advertising, marketing, and recommending the use of the Seresto Collars while concealing and failing to disclose or warn of the dangers known by

Defendants to be associated with or caused by the use of or exposure to the Seresto Collars and imidacloprid and flumethrin;

- m. Continuing to disseminate information to its consumers, which indicates or implies that Defendants' Seresto Collars are safe for use on dogs and cats; and
- n. Continuing the manufacture and sale of its products with the knowledge that the Seresto Collars were unreasonably unsafe and dangerous.

316. Defendants knew, or otherwise should have known, that it was foreseeable that consumers' pets, including Plaintiffs' and the other Class Members' pets, would suffer injuries as a result of Defendants' failure to exercise ordinary care in the manufacturing, marketing, promotion, labeling, distribution, and sale of the Seresto Collars.

317. Plaintiffs and the other Class Members did not know the nature and extent of the injuries that could result from the intended use of and/or exposure to the Seresto Collars and imidacloprid combined with flumethrin.

318. Defendants' negligence was the proximate cause of the injuries, harm, and economic losses that Plaintiff and the other Class Members suffered, as described herein, including the injuries suffered by Plaintiffs' and the other Class Members' pets.

319. Defendants' conduct, as described above, was reckless. Defendants regularly risked the lives of consumers and users of their products, including Plaintiffs and the other Class Members and their pets, with full knowledge of the dangers of the Seresto Collars. Defendants made conscious decisions not to redesign, re-label, warn, or inform the unsuspecting public, including Plaintiffs and the other Class Members. Defendants' reckless conduct therefore warrants an award of aggravated or punitive damages.

320. As a proximate result of Defendants' wrongful acts and omissions in placing the defective Seresto Collars into the stream of commerce without adequate warnings of the hazardous and neurotoxic nature of imidacloprid + flumethrin, Plaintiffs' and the other Class Members' pets have suffered severe, permanent physical injuries. Plaintiffs and the other class Class Members have endured pain and suffering and have suffered economic losses (including significant expenses for medical care and treatment of their pets) in an amount to be determined.

LIMITATION ON ALLEGATIONS

321. The allegations in this pleading are made pursuant to the state laws of Ohio, Kansas and Indiana. To the extent state law imposes a duty or obligation on the Defendants that exceeds those required by federal law, Plaintiffs do not assert such claims. All claims asserted herein run parallel to federal law—i.e., the Defendants’ violations of state law were also violations of federal law. Had Defendants honestly complied with state law, they would also have complied with federal law.

322. Additionally, Plaintiffs’ claims do not seek to enforce federal law (other than the Magnuson-Moss Warranty Act (“MMWA”). Other than the MMWA, these claims are brought under State law, notwithstanding the fact that such claims run parallel to federal law.

323. As alleged in this pleading, Defendants violated U.S.C. § 136j and 40 C.F.R. § 10(a)(5) by distributing the Seresto Collars, which were misbranded pursuant to 7 U.S.C. § 136(g). Federal law specifically prohibits the distribution of misbranded pesticide products.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs, individually and on behalf of the members of each of the Classes described in this Complaint, respectfully request the Court to enter an Order:

- A. certifying the proposed Classes under Federal Rule of Civil Procedure 23(a), (b)(2), and (b)(3), and, in the alternative, (c)(4) as set forth above;
- B. declaring that Defendants are financially responsible for notifying the Class members of the pendency of this suit;
- C. declaring that Defendants have committed the violations of law alleged herein;
- D. providing for any and all injunctive relief the Court deems appropriate;
- E. awarding statutory damages in the maximum amount for which the law provides;
- F. awarding monetary damages, including but not limited to any compensatory, incidental, or consequential damages in an amount that the Court or jury will determine, in accordance with applicable law;
- G. providing for any and all equitable monetary relief the Court deems appropriate;
- H. awarding punitive or exemplary damages in accordance with proof and in an amount consistent with applicable precedent;
- I. awarding Plaintiff and the other Class Members their reasonable costs and expenses of suit, including attorneys' fees;
- J. awarding pre-and post-judgment interest to the extent the law allows; and
- K. providing such further relief as this Court may deem just and proper.

DEMAND FOR JURY TRIAL

Pursuant to Rule 38 of the Federal Rules of Civil Procedure, Plaintiff hereby demands a trial by jury on all claims so triable.

Dated: September 16, 2022

Respectfully submitted,

REESE LLP
